Ready for NRFit?

What:

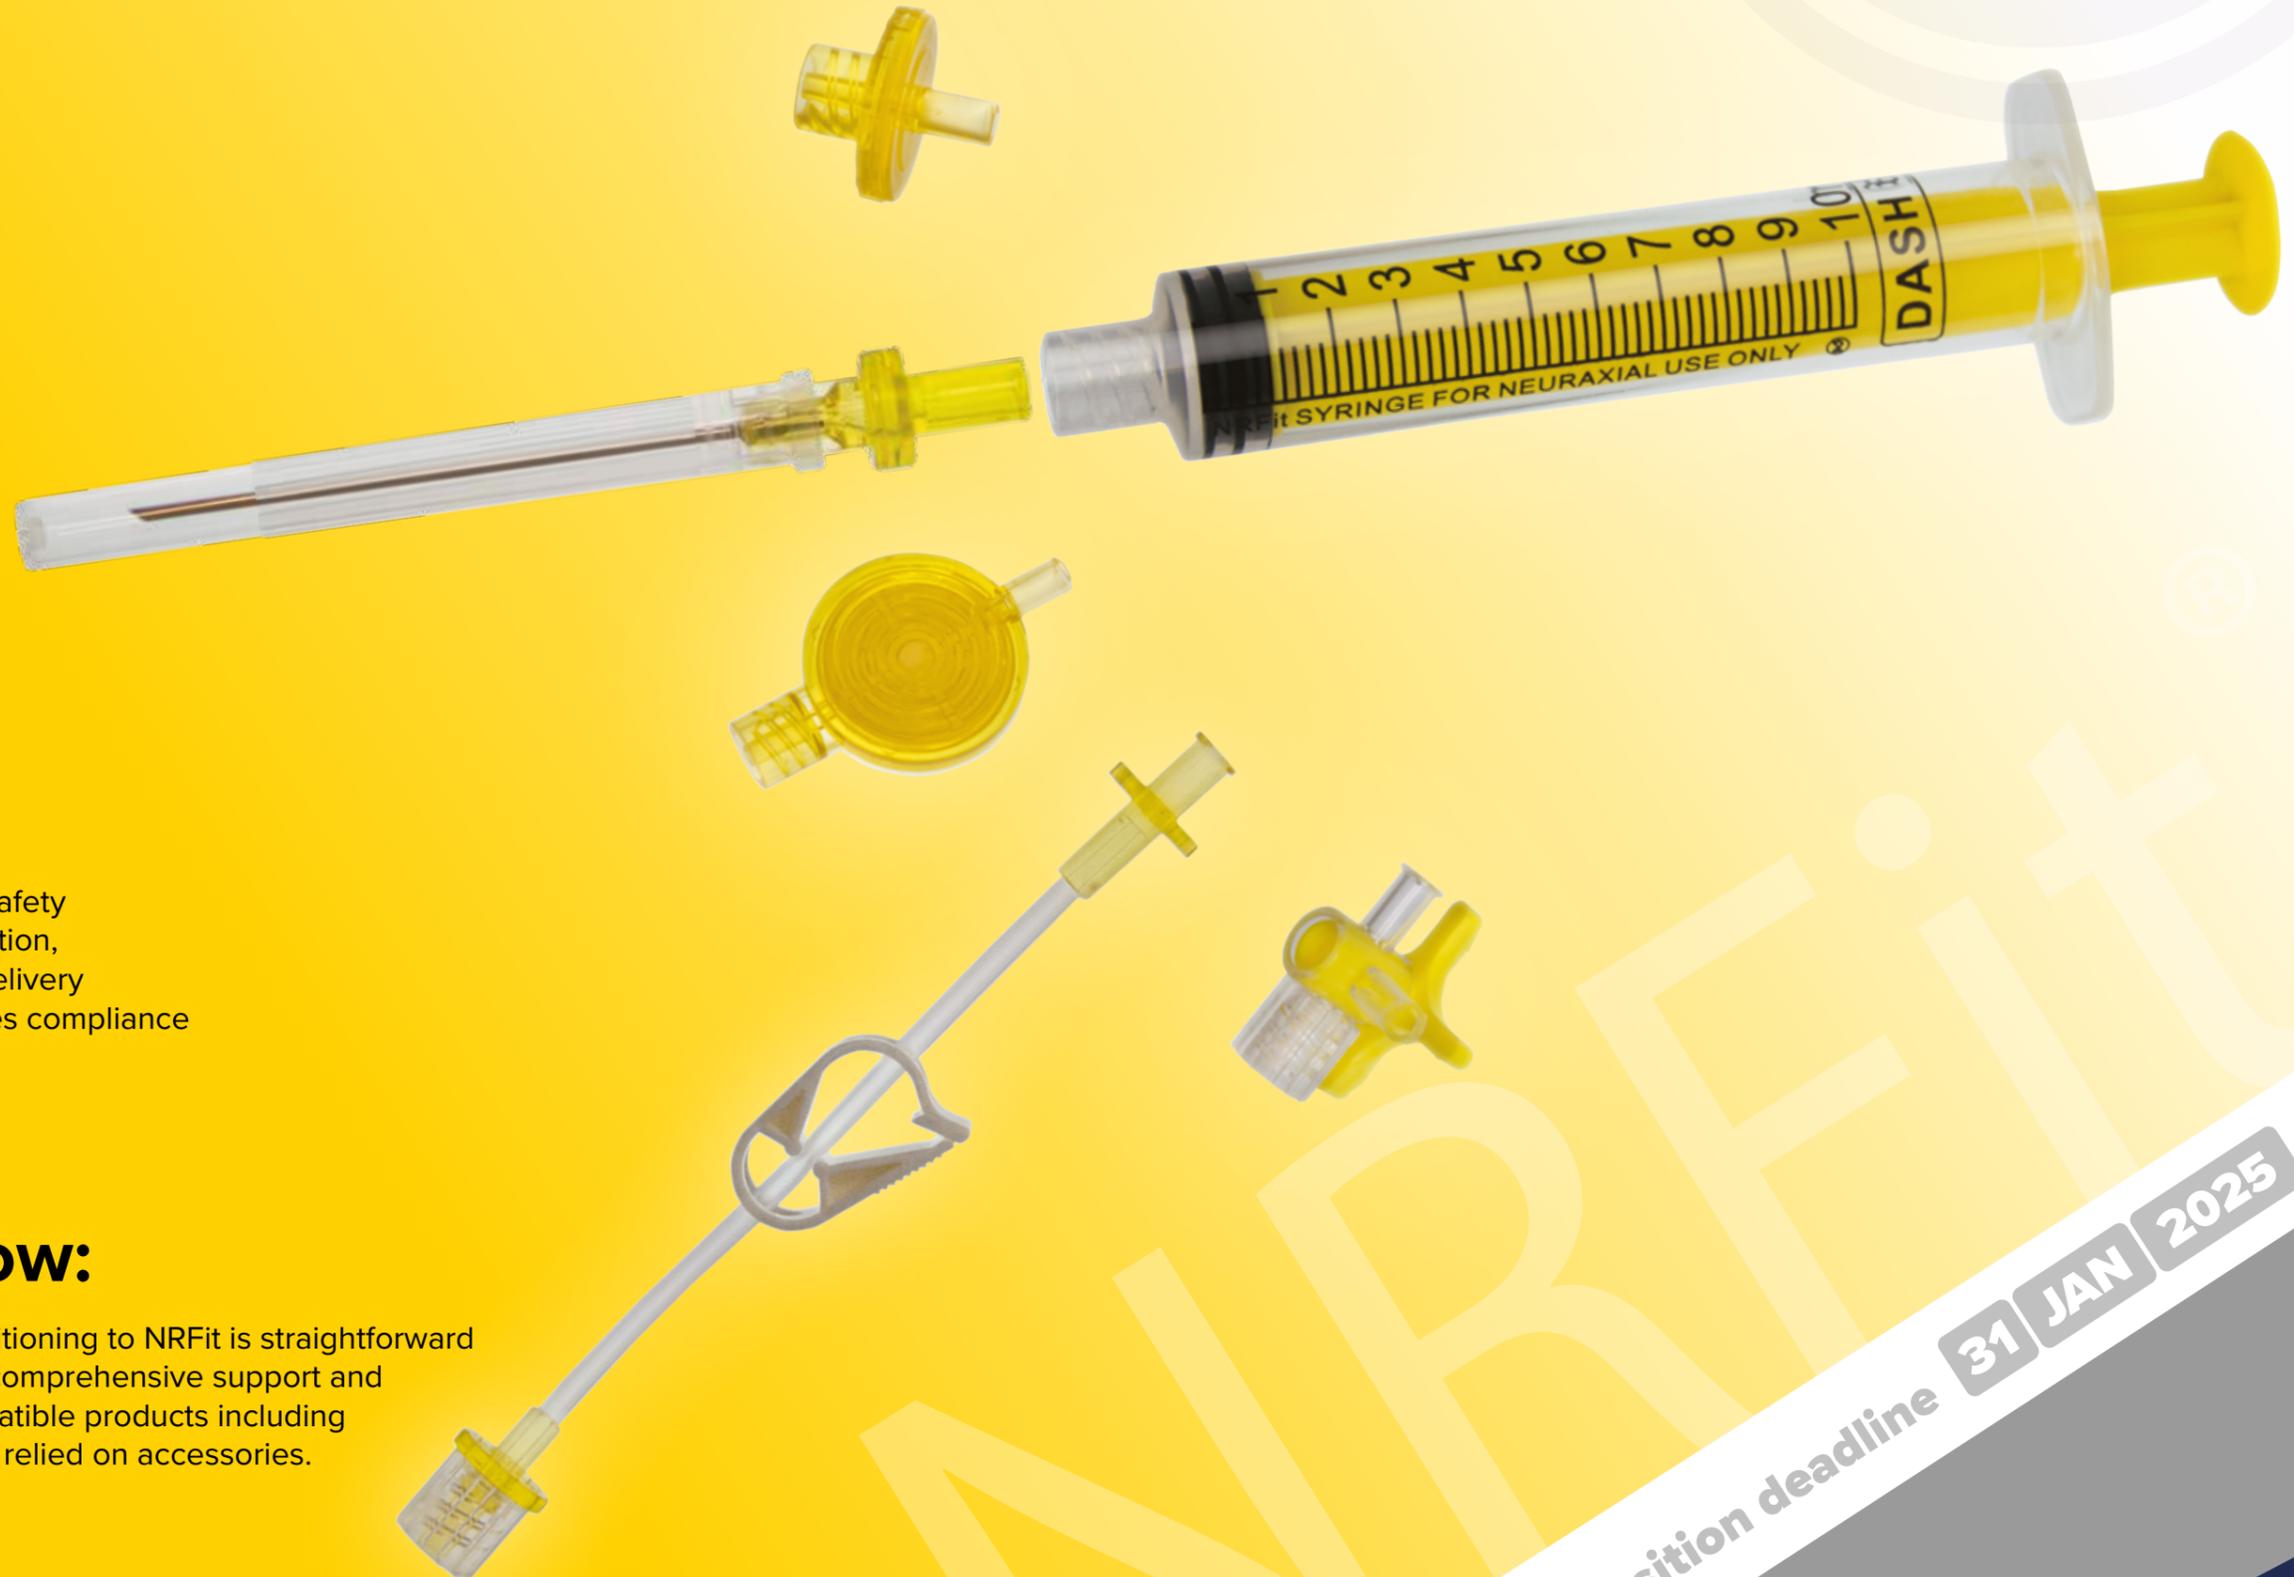

The NHS issued a National Patient Safety Alert in Oct '24 instructing that all NHS-funded providers must switch to NRFIT connectors for all intrathecal and epidural procedures and delivery of all regional blocks. To include, but not limited to, administering medication and taking samples from neuraxial sites, including neuraxial anesthesia, fascial plane blocks and nerve blocks, lumbar puncture and wound infiltration.

Why:

NRFit enhances patient safety by minimising misconnection, reducing 'wrong route' delivery of medication and ensures compliance with industry standards.

How:

Transitioning to NRFit is straightforward with comprehensive support and compatible products including many relied on accessories.

Transition deadline 31 JAN 2025
