OUR OFFERING

Our process is as robust as our Towers. It's quick and streamlined in order to provide our clients with a hassle free security solution.

- 1 4 x Thermal/Optical cameras or PTZ with Darkfighter technology, providing 360-degree coverage without the need for floodlights
- 2 Remote access via your mobile device
- 3 24/7, 365-days a year monitoring included
- 4 Compatible with all site power sources
- 5 CE-Certified mast extends to over 6 metres
- 6 Compact, robust design accredited by Police Crime Prevention Initiatives

OVERVIEW

Given the rise in theft, now is the moment to trust in the experts. Watchtower Security Solutions work in multiple countries across Europe and have more than 27 years security experience.

The Mobile CCTV Tower is an all-in-one surveillance solution, specifically designed to meet the challenges of securing vulnerable sites of all size & type.

We provide CCTV Towers to a number of markets, including infrastructure, civil engineering, construction, vacant property, utilities, ports and airports. The towers can be rented with flexible terms.

The benefit of our Towers is threefold. Firstly, unwanted intruders on sites can be detected quickly, minimising damage or loss. Secondly, you could save over 60% in the equivalent manned guarding costs. Thirdly, you may find that having our Towers on site reduces the risk of insurance liability.

The Rapid Deployment, 24/7 Monitoring and our In-House Technical Team combine to provide a high-quality service providing peace of mind throughout the duration of your development.
