

Mollina

A DISCREET, ALMOST EVANESCENT PRESENCE CHARACTERISED BY SOFT, ELEGANT SHAPES THAT PLAY WITH THE SHADES OF ITS MATERIALS.

Mollina is a lightweight seat, with an almost ethereal design. However, its materials are very solid and have been selected specifically for each of its parts: metal for its slightly inflexed legs and armrests; polyurethane for its frame.

Mollina's curvilinear shape is slightly retro-inspired. Light as a chair but as comfortable as an armchair, this seat's discreet elegance can fit into any environment, also thanks to the colours chosen for its different versions, which range from white to beige to anthracite.

Armchair: back and armrests in painted shaped steel plate; frame in painted compact polyurethane; padding in polyurethane foam covered in fabric; legs in tapered, painted press-folded tubular steel.
