

# Accenture People Hub

**THE ALTERNATION OF TRANSPARENCY  
AND OPACITY ON THE FAÇADE PROVIDES  
THE DOUBLE FUNCTION OF PROTECTION  
AND PERCEPTION OF THE EXTERNAL  
SPACE.**

A blade of glass and steel, resembling a prow pointing north-west, acts as the fulcrum of the People Hub building's architectural composition, one of Accenture's offices in Italy. Comprising fifteen floors above ground and covering a surface of approximately 31,500 square metres, this building is one of the most notable achievements of the Milanofiori Nord sector in Assago.

**ASSAGO, MILAN**

TYPOLGY  
**New building,  
Headquarters**

CLIENT

REALIZATION  
**2019-2022**

PROFESSIONAL SERVICE  
**Architectural Project  
Artistic site supervision**

AREA  
**31.500 sqm**

**THE TWO FAÇADES OF THE COMPLEX DEVELOP FROM THE BUILDING'S 'PROW'. THE LARGEST, TALLEST BODY FACING THE MOTORWAY IS CHARACTERISED BY A TIGHT SUCCESSION OF VERTICAL ELEMENTS AND HORIZONTAL STRING COURSES THAT BREAK UP ITS UNIFORM GLASS SURFACE.**

The glazed cusps that punctuate the south west-facing façade feature one transparent side and a frosted one that offers protection against solar radiation.

The building's shorter north-facing façade overlooking the wood is entirely glazed, and therefore offers maximum transparency; its exposure allows for greater permeability and increases the building's relationship with the surrounding environment.

**CREATING A GEOMETRIC SPACE FROM WHICH ALL SURROUNDING BUILDINGS CAN BE SEEN, THE NEW AERIAL SQUARE DEVELOPED AT THE BUILDING'S ENTRANCE IS LINKED TO THE NEARBY UNDERGROUND STATION.**

The hall acts as an element of perceptive connection between the outside square, the wood and the inside of the building. Thanks to a material continuity between the building's outside and inside, the hall is turned into a covered square that gathers and conveys all the complex' flows, as well as housing most communal functions - training area, foyer and cafeteria. Located on the upper floors, the offices will feature spaces of different size and function that will house up to 3,800 people. The sky-bar on the top floor will be a relaxing place offering a wonderful view over the surrounding landscape.
