A note on the status of the name *Centrobolus* Cook, 1897 (Spirobolida: Pachybolidae)

By Richard L. Hoffman

ABSTRACT

Discovery of drawings of the male genitalia of *Spirobolus luctuosus* Peters, the type species of *Centrobolus* Cook, 1897, confirms the earlier assumption (Hoffman, 1971) that *Centrobolus* is the correct generic name for the numerous South African spiroboloids described under the name *Chersastus*.
