

Table 1: Acronyms of biological specimen collections harboring millipedes. **T** indicates type holdings. many of the museum's and collections listed have web sites and can be found on-line. The last column indicates the size of the collection for collections containing more than 1,000 lots. A lot is defined as 'all specimens belonging to a single species collected at a single collecting event, usually the content of a 'vial' in the identified [= formed] collection.
