Tactile and Auditory Guide

November 2025

This tactile and auditory guide lists items that can either be touched or heard during your visit. The Field Museum is a dynamic institution and we are always updating areas so some items may have been relocated, removed, or added.

This list sorts the items into exhibits within the museum. If an "A" is by the object name, then it is auditory, and a "T" signifies tactile and an "S" signifies smell.

Please return this guide after using. Return to Visitor Center, Information Desk, or Security. Thank you!
