Monumental Poles answer key:

- 1. Giant
- 2. Up
- 3. Sun
- 4. Clock

What are the eyes looking at?
TUSK

ADVENTURE GUIDE: STANLEY FIELD HALL

Fun activities to do together

MÁXIMO THE TITANOSAUR

Titanosaurs are the largest animals to have ever walked the Earth.

Image: Field Museum of Natural History

Make a guess: how many steps is it from the tip of Máximo's tail to his head?

Guess # steps

Walk the length of Máximo to see how close you got to your guess.

Actual # steps

UPPER LEVEL

Selfie spot: Head to the upper level for the best spot to take a selfie with Máximo the Titanosaur.

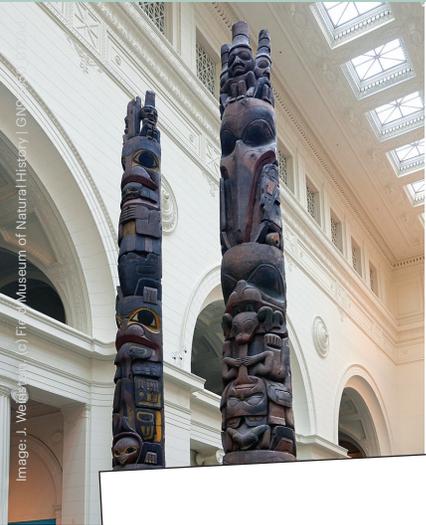

Images: Field Museum of Natural History

Fun with sound: Try talking as you walk under one of these arches. Can you hear the echo?

Images: Field Museum of Natural History

MONUMENTAL POLES

These poles have many eyes—but what are they looking at??? Solve the clues below; the answer is spelled in the boxes.

*Answer key on the back page.

The size of Máximo the titanosaur.

Look in this direction to spot pterosaurs.

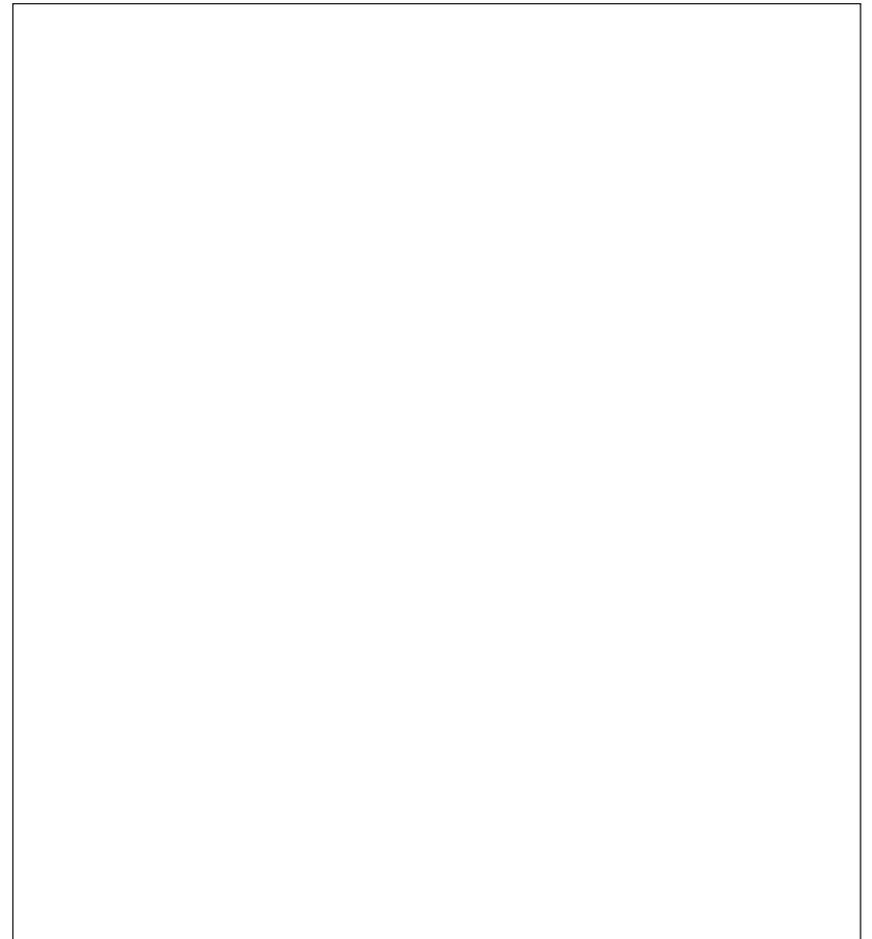

Something that shines through the skylights.

Something hanging at the end of this room
(you probably have one at home)

DESIGN MOTIFS

Stanley Field Hall is full of decorations on the walls and ceiling. Pick a design and draw it in the space below.

See who in your group can spot it first!

FIGHTING ELEPHANTS

Act out the fighting elephants with your group and make sure to take a photo. Get creative—use what you have with you as props.

Image: Field Museum of Natural History

The skin and tusks of these elephants are real. Can you guess what isn't?

The eyes

THE MUSES

Look up! Can you find the four muses in the corners of this space? Each has a different meaning:

Record

Research

Science

Sharing Knowledge

Talk with your group: What do you think she is reading to the baby?
