IS CODAM FOR YOU?

We hope so! If you are between 18 and 30 and want to become a top-level professional programmer, check this out!

You don't need qualifications or diplomas, and Codam will take care of your tuition. You just need the will to push yourself, to have perseverance, and the desire to learn how to learn.

Are you ready for the opportunity of a lifetime in the heart of Amsterdam? Are you ready to accept this challenge? Do the online game to see if Codam suits you!

HOW DOES CODAM WORK?

- You don't need any experience or previous education.
- There are no teachers! You work together in teams, in a peer-learning based system.
- It's a game based educational system where you don't work with semesters, but with levels.
- Codam is always open: 24 hours a day, 7 days a week.
- We pay your tuition, you're not charged in any way.
- You finish Codam in about 3.5 years, full-time.

HOW CAN YOU JOIN?

Codam is open to all: no knowledge about technology is required. What you need is perseverance and determination, that's what it's all about! The intended level is high, and the selection process is intensive.

You do an online game via codam.nl. If you beat the game, you're invited for an intensive selection month, the 'Piscine'. Here you learn the basics of coding. If you get through this selection, you can start the curriculum of Codam! During your time at Codam, you work on projects in teams. You can choose your own route: graphic programming, malicious code, AI, web and app development and much more!

AFTER CODAM

After you finish Codam, you can work anywhere! Companies can't wait to hire you: Booking, Instagram, Nike, Spotify... or you might just end up creating your own startup! At Codam, you learn to think creatively, work hard and adapt quickly. This isn't only useful in programming, but also as a manager, designer or any other position.
