Audio/Video Engineer

Who we are

Member of the 42 Network, Codam Coding College is the only peer-to-peer software engineering institution in the Netherlands, with a world-class curriculum empowering the next leading generation of tech talent. Through our educational model, students are trained to become qualified software engineers and design inclusive solutions for the challenges of today and tomorrow!

Would you like to work at a young foundation that is changing the educational model in the Netherlands? Are you curious, creative and want to work with the newest high-end audio and video equipment?

The key responsibilities

- Manage Codam's YouTube channel: shoot, edit and publish the videos. Work closely together with the Communication Manager and Head of Partnerships and Talents to ensure a steady creation of new content.
- Before all events, making sure that the technical equipment in the Auditorium is ready and available, and during the events, record and stream to later share the content with our community.
- Upon request from the Head of Studies, record videos for educational purposes in the school's Green Room. Videos must be in line with existing layout and style.
- Create and edit all graphic assets (digital and print), including photo, video, flyers, clothings.
- Responsible for availability planning of the Auditorium and Green Room.
- Staying up to date with audio, video and image editing technologies.

Who are we looking for?

- Experience with a/v engineering, equipment and processes.
- Technical knowledge of audio, video and image creating, editing and streaming softwares and platforms, such as Adobe Premiere, After Effect, Photoshop, Audition, Lightroom, OBS, Youtube, Da Vinci Resolve, et cetera.
- Creative; new ideas to create fun, innovative, informative and inclusive high-quality content.
- Excellent communication skills and responsive to all A/V needs in the organization.
- Flexible, open, and always available for ad-hoc tasks.

CODAM

What we offer you

- Part of a small team with a passion for making education accessible to everyone.
- Opportunity to grow and improve your A/V engineering skills on the job.
- Working in the heart of Amsterdam, on a state-of-the-art campus surrounded by students.
- Part-time job (24 or 32 hours a week), starting December 1st.
- Salary indication: 32k gross yearly equivalent full time.
