THEN!

YEOW!

New bust too **BIG** for 5-ft-1 body
- EXPERTS SAY

Plastic surgeons say Hayden has made mountains out of molehills since May 22, 2009 (left). She flaunted her new curves on March 30

SUPER-SIZED HAYDEN WINS BOOBY PRIZE!

NASHVILLE sexpot Hayden Panettiere is suddenly bustin' out of her bikini top, but she's a big boob if she thinks she's fooling anyone!

Experts say her new-found abundance definitely is NOT a gift from Mother Nature.

"There's absolutely no question she's had breast augmentation," noted Morristown, N.J., cosmetic surgeon Dr. Brian Glatt tells GLOBE.

Glatt and other experts compared the shocking then-and-now photos and believe the 23-year-old actress boosted her bust with surgery, which can cost from \$3,000 to \$7,000 with an additional \$750 to \$2,000 for the actual implants.

The stunning 5-foot-1 blonde was spotted March 30 strolling on the beach in Hollywood, Fla., with her rumored fiance Wladimir Klitschko, a Ukrainian heavyweight boxing champ who towers over her at 6-foot-5. Experts say Panettiere, who also played cheerleader Claire Bennett on the NBC series *Heroes* from 2006 to 2010, seems to

have gone overboard with her implants.

"They appear to be somewhat too wide for her chest and body so she looks unnatural and 'augmented,'" notes Glatt. "She looks to barely be an A cup in the 2009 photo. She's now a D cup or at least a large C. These changes are very obvious and dramatic. Her cleavage is too narrow and her entire chest is larger."

Glatt says it appears the star has saline-filled implants which "tend to be more artificial-looking than silicone gel. They also appear to have been inserted over the muscle which makes them look more 'stuck on' than natural."

Beverly Hills plastic surgeon Dr. Raffi Hovsepian agrees Panettiere likely had above-the-muscle saline implants, telling GLOBE, "Unfortunately, it appears she's developed signs of implant rippling that can occur with a thin person who has minimal breast tissue."
