

Mole & Skin Tag Removal

Pre & Post Operative Instructions

Local Anesthesia Instructions

This method uses medications like Lidocaine to numb the specific area where the mole or skin tag will be removed. You will remain fully awake and alert during the procedure, feeling no pain in the treated area. This option is ideal for those who prefer a quicker recovery time with minimal postoperative side effects.

- **Fasting:** You do not need to fast and may eat and drink as usual before the procedure.
- **Transportation:** You may drive yourself home and do not require a caregiver after surgery.

Pre-Operative Instructions

The Day of Surgery: Your Preparation Guide

On the day of your surgery at Asia Pacific Surgery, we prioritize your comfort, safety, and the success of your procedure. To help everything go smoothly, please follow these guidelines:

- **Jewelry and Valuables:** Remove any jewelry near the treatment area and refrain from bringing valuables to the clinic.
- **Makeup and Skincare Products:** Do not wear makeup or apply skincare products on the day of your procedure.
- **Clothing:** Wear loose, comfortable clothing that allows easy access to the area being treated.

Post-Operative Instructions

After the Procedure

- **Site Care:** Keep the treated area clean and dry. Gently clean with mild soap and water as needed.
- **Physical Activity:** Avoid strenuous activity on the day of the procedure. Normal activities can usually be resumed the next day.
- **Medications:** Over-the-counter pain relief like Tylenol (Acetaminophen) can be taken if needed. Avoid NSAIDs for the first 24 hours if minor bleeding occurs.
- **What to Expect:** Some mild redness or swelling at the site is normal and should subside within a few days.

Follow-up Care

- **Prioritizing Appointments:** Attend any scheduled follow-up appointments to ensure proper healing.

Patient Communication Guide: Who to Contact Post-Operation

Type of Concern	Contact Information	Instructions/Examples
