

CENTER OF EXCELLENCE ENERGY TRANSITION

COE presentation

The CoE is dedicated to the support of all the Public Transport Authorities (PTA) and subsidiaries of the Keolis group in their energy transition projects.

The team gathers experts and engineers with skills in maintenance, vehicles and sub systems knowledge, fueling or charging infrastructures and modeling, who deeply master transitions from diesel to biofuels (HVO, RME...), CNG and bioCNG, hybrids, Battery Electric Vehicles and hydrogen. **This knowledge of all energetic modes allows Keolis to act as an objective and experimented partner providing his practice experience as a day to day operator**, oftenly out of more theoretical approaches to far from the field. As a Public Transport Operator, independent of all vehicles manufacturer or energy supplier, Keolis proposes energy migration solution locally adapted without promoting a particular energy.

Offer of service

An international network

Keolis has set up an international network of Energy Transition Centers of Excellence in order to improve the coverage and the management of Energy Transition in all the countries where the group is operating. The Head Quarter's CoE animates and coordinates this network of experts that allows a global and local vision of the stakes.
