Service

Our service makes the difference

AB Service: Partnering with customers 24/7, 365 days a year.

service

AB: experts and industry leaders in cogeneration solutions, engaged in the development of systems in the field of energy sustainability.

AB ECOMAX® CHP and on-site generation systems maximize energy efficiency, while reducing overall fuel consumption and emissions.

Our BIOCH4NGE® renewable natural gas systems help our customers successfully contribute and transition to cleaner, renewable energies.

Our emission control technologies allow us to comply with national and local regulations.

Superior support for a superior product.

Comprehensive Product Support

AB Service Advantages begin at start-up.

AB technicians service and maintain the entire installation, not just the engine. Following installation of the plant, we ensure a successful start-up and stand by your side for the operational lifetime of the plant.

Best-in-class product support through-out the CHP life cycle

Major Overhaul and Plant Life-Cycle Optimization

With in-house major overhaul capabilities, AB Service will assist in bringing your investment back to as-new conditions, starting a new life-cycle at equal or better performance.

We offer far more than comprehensive maintenance services: As a highly specialized engineering company, AB is also in a unique position to offer upgrades that improve engine and plant performance following an overhaul.

AB Help Desk always there when you need it

24/7 monitoring capabilities and remote assistance complement the strength of AB Service

All AB plants are fully IoT enabled and connected to our remote monitoring control room and help desk. In the event of alarms or shutdowns, the online system automatically alerts the local team. Our multilingual help desk is available around the clock and will work hand-in-hand with local teams, quickly resolving any issues and ensuring prompt resolution.

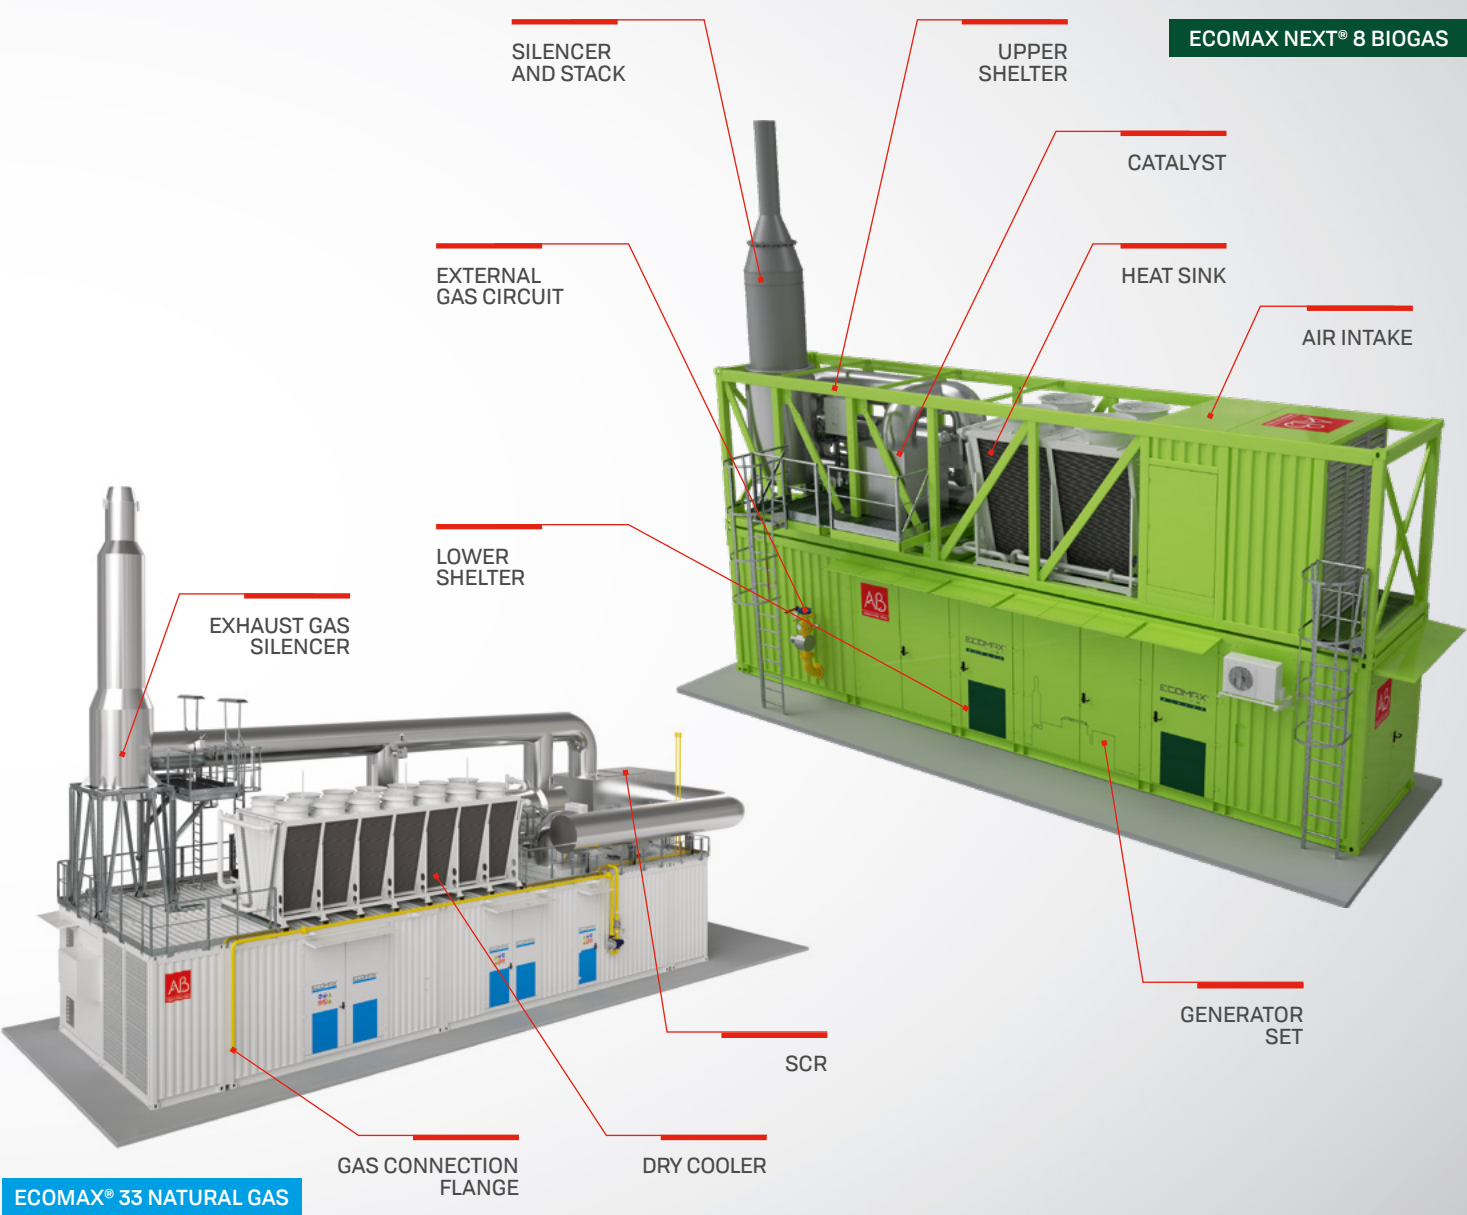

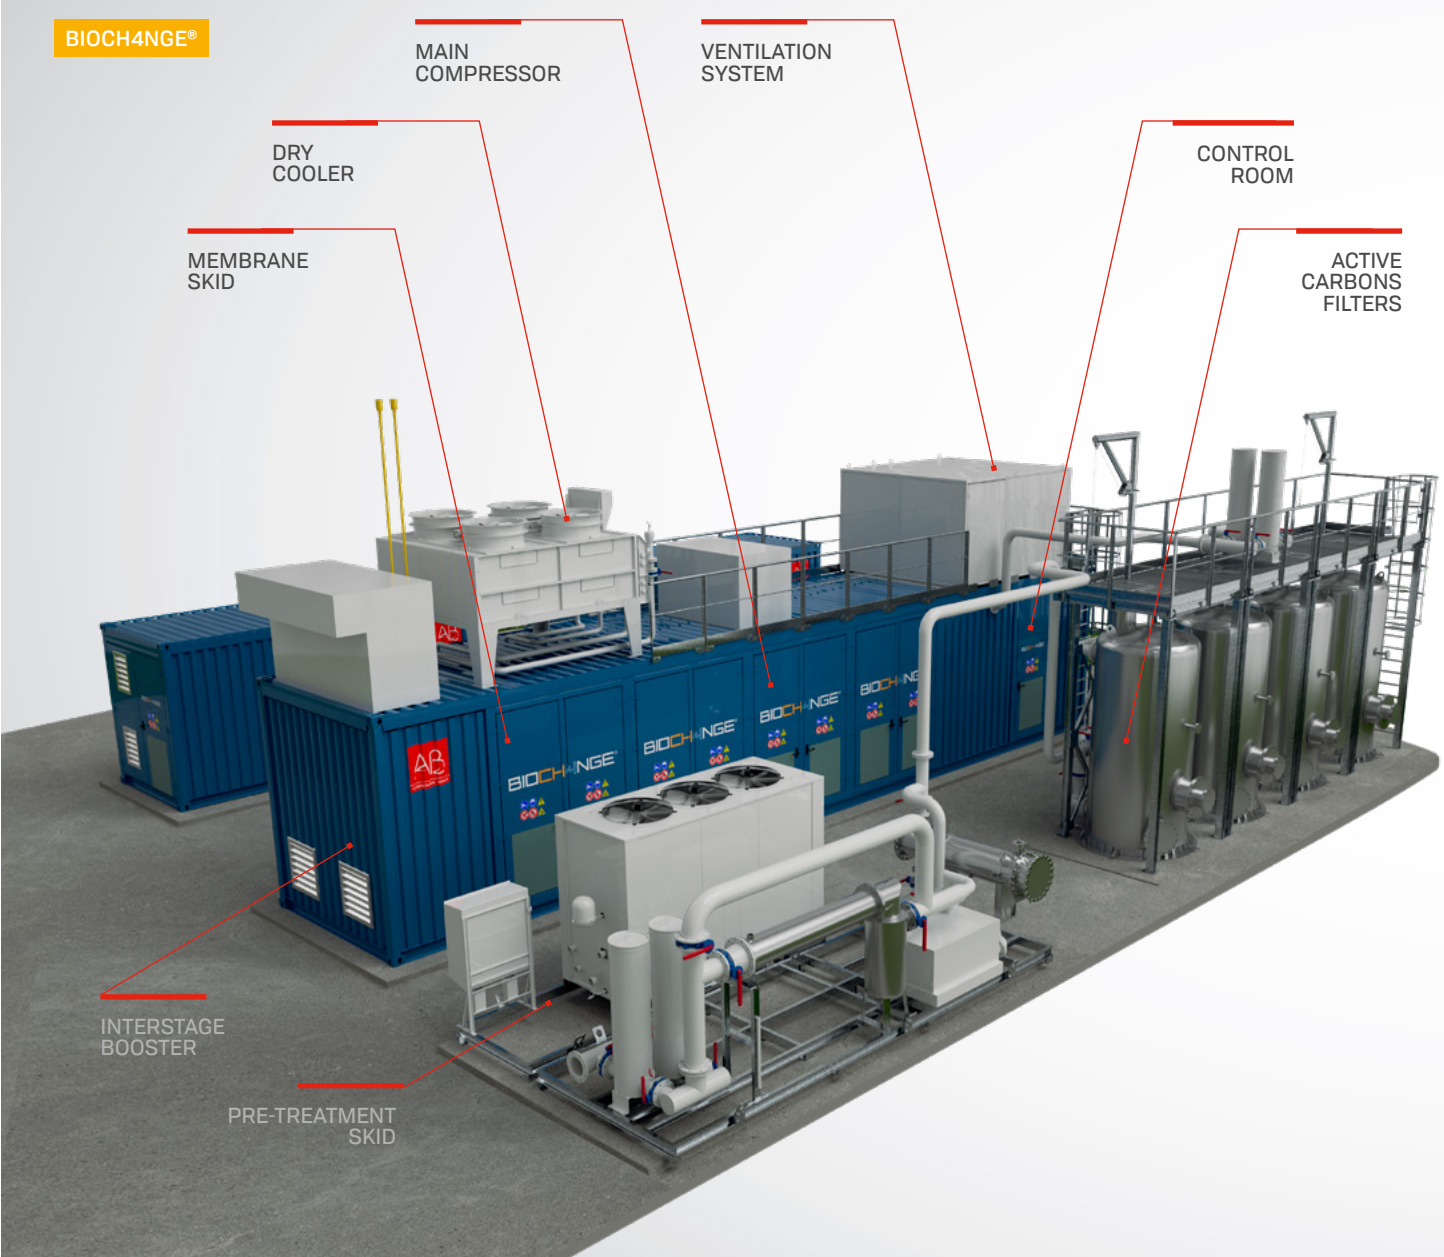

Remote control and help desk

Customer provided public/static IP address, gateway IP and local IP to connect Firebox to the LAN.
