Way

ABetter Way

A scenic landscape featuring a dirt path that winds through a rocky, grassy hillside. The path is flanked by vibrant yellow wildflowers. In the background, a layer of clouds sits below the horizon, suggesting a sunset or sunrise. The overall tone is warm and inspiring.

There is a different way of enhancing production to boost efficiency and increase profits – while performing more sustainably. A Better Way. **Discover yours with AB.**

solutions.

ABOUT US

Cogeneration,
biogas upgrading,
biomethane and CO₂ liquefaction,
air emission treatment.

Plants,
expertise,
technologies and
service.

For over
40 years

we have been working alongside our customers helping them
to improve their competitiveness with energy savings while
reducing their environmental footprint.

customized solution

Products and services tailored to specific needs

plug & play installation

Reduced onsite costs, time and risks

turnkey system

Full accountability and customer peace of mind

reliability and quality

Expertise on our customers' production processes

single point of contact

From project start through commissioning and ongoing service

performance

Plant availability close to 100%

+40 years of
experience

140+ engineers

1,200+ employees

350+ specialist
field
technicians

People remain our most vital corporate asset. With multidisciplinary and shared skillsets, our experts are guided by a common passion and vision, helping us perform at the highest levels for our customers' benefit.

A world map with a dark blue background and white cloud patterns. The map shows the outlines of continents. Countries where AB has branches are highlighted in solid red. These include the United States, Canada, Mexico, Argentina, Brazil, Australia, and several European countries: the United Kingdom, France, Germany, Italy, Greece, Spain, Poland, Czech Republic, Croatia, Serbia, Romania, Bulgaria, and Israel. Small black triangles are placed on the red areas to indicate specific branch locations. The background of the entire slide is a dark blue sky with white clouds.

AB is a group of companies with branches worldwide, operating in emerging and industrialized markets that value energy efficiency and sustainability.

The AB process from start to finish occurs in our world-class engineering and production center in Orzinuovi (BS – Italy), encompassing 40,000 m² of interconnected buildings.

Within the engineering hub, over 140 engineers plan, design and manage the hydraulic, electrical, mechanical, process and IT activities involved in delivering customized solutions for our customers' specific requirements. AB GRADE is a recognized center of excellence for research and development of new technologies in energy transition. DOABLE, the Group's technological hub dedicated to digitizing processes, embodies AB's commitment to innovation.

TECHNOLOGIES

- ECOMAX® COGENERATORS
(Natural Gas, Biogas, Landfill,
Special Gas)
- BIOCH4NGE®
BIOGAS-TO-BIOMETHANE
UPGRADING SYSTEM
- BIOMETHANE LIQUEFACTION
SYSTEM - CH4LNG
- DeNOx SCR REACTOR
- CO₂ RECOVERY SYSTEM
- REGENERATIVE THERMAL
OXIDIZERS (RTO)
- TREATMENT OF OILY MISTS
- TREATMENT OF COMPLEX
EMISSIONS
- TREATMENT OF ODOR

AB Service, with its 350 specialist technicians, is the Group company dedicated to monitor and maintain the plants we deliver to guarantee long-term optimal performance. A strategic choice to ensure the certainty of investment payback, with machine downtime minimized and an average plant operational availability close to 100%.

“ Amadori chose to collaborate with AB because the technical skills and planning capacity of its professionals emerged immediately. But above all, what we think is important is to be able to rely on considerable expertise in terms of after-service support.

FERRERO

“ The choice of AB stems from a rigorous comparison with what other competing companies offered. We are also at the top of our industry and we like to dialogue with the best.

Over 1,450 elite customers. A firmly established reputation. Our customers' satisfaction is overwhelming proof of the value AB offers.

UNITED COLORS
OF BENETTON.

“ AB supplied an intervention plan consistent with our expectations, also indicating improvement solutions which are an integral part of their specialist experience. The plant built allows us to achieve the energy-saving targets that we had planned.

“ The interaction with AB also includes service and maintenance requests, which are met by a dedicated service 24 hours a day, every day of the year. This positively influenced the final decision to entrust the order to AB.

“ The collaboration with AB has become strong thanks to the solid foundations of its know-how and to its consolidated experience in the international cogeneration market, both for the volume of plants installed and for the quality of the service.

“ We were favorably impressed by the fact that only AB is able to follow the design, construction, installation and maintenance of a plant of this type directly and in full.

A background image showing two hands, one from a darker-skinned person and one from a lighter-skinned person, gently holding a globe. The globe is partially obscured by the hands and the text. The background is a soft-focus landscape with tall grass and a blue sky.

3,000+ online videos

Video content from around the world

A global community of sector key players

AB is the publisher of the NetZero Tube portal, which consists of three video channels: Biogas Channel, Biomethane RNG Channel and Cogeneration Channel

Through these web channels, AB promotes an international exchange of information and technical-scientific dialogue on natural gas and biogas cogeneration, biomethane, sustainability, energy efficiency and related topics.

A global library of AB's know-how, expertise, and innovation contained in three multimedia channels, available anytime, anywhere.
