

## Safety first

Before you do anything, check your surrounds and make sure everyone is safe before exchanging any details.

## What happens after an accident?

An accident scene can be a busy place and you can find yourself wondering what to do. Here's some information you can collect that will assist in your claim:

### Accident information:

Such as what happened including date, time and location.

---

### The other people involved:

Name, address, licence number, rego and contact details of anyone else involved.

---

### Any independent witness information:

If anyone saw the accident, get their name and contact details also.

---

## Tip

If you have a smart phone, take some images of damage, point of impact, the other person's driver's licence or rego plate etc. This records date and time also.
