

Gavin Keeley GAICD FACS CP ACEcD

Gavin Keeley is a technology executive and non-executive director with four decades of experience across the United Kingdom, Europe, North America, Asia and Australia, much of it in general insurance.

At Aviva PLC, the United Kingdom's largest insurer, Gavin created and led the company's first Chief Technology Officer function, responsible for an annual technology budget of approximately one billion US dollars across a technology community of more than six thousand people. He then served as divisional Chief Information Officer for Aviva's intermediated general insurance business, a remit that included the underwriting and actuarial team. He also led the corporate venture team that built the National Flood Database with Ordnance Survey, licensed across the UK insurance market and adopted by the UK Government, and that patented pay-as-you-drive insurance.

In Australia, Gavin was Executive General Manager, Business Technology Solutions at Suncorp, and Chief Technology Officer at Hollard Insurance, where he delivered the country's first APRA-approved cloud strategy.

Gavin holds GAICD, is a Fellow of the Australian Computer Society and an Adjunct Professor at QUT, and chairs the AICD Sunshine Coast Regional Forum. He was inducted into the ACS Hall of Fame in 2021.
