September 2021!

I plant a tree, we grow forests

Welcome to Life Terra's Newsletter of September 2021 where we update you on the latest developments in planting events, technology and education activities in the project.

We are ambitious because we know that the world needs massive #climateactionnow.

Life Terra is a project co-funded by CINEA through the LIFE Programme.

Recent Project Activities

Life Terra in Italy.

Last week, the Life Terra team travelled to Italy to visit the area where the first Italian professional planting will take place working with our partner Legambiente. Some of the species to be planted are english oak (*Quercus robur*), white poplar (*Populus alba*), ash (*Fraxinus angustifolia*), alder (*Alnus glutinosa*), or elm (*Ulmus minor*). Implementation will take place between autumn 2021 and spring 2022.

Scouting in Madrid

Life Terra went to the Guadarrama Hill near Madrid to scout for new land on horses! These hills have suffered from fires, overgrazing and neglect - but thanks to Life Terra this region will host some new trees this coming planting season.

Life Terra Summer Visits

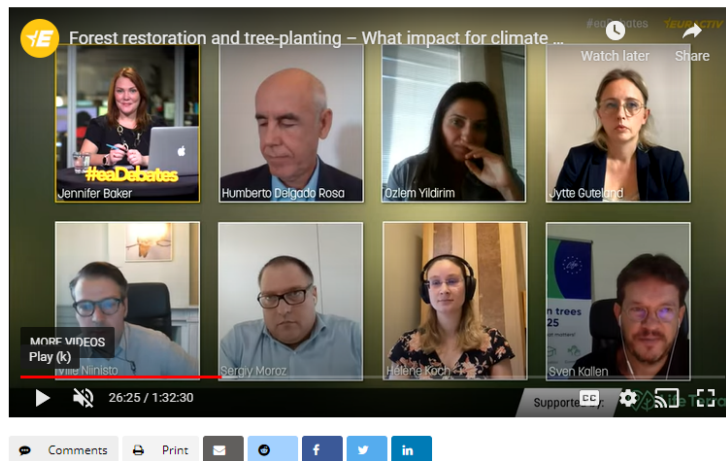

In addition to Italy and Madrid, Life Terra traveled to other implementation countries to visit planting sites from Spring 2021 and see how the trees were doing. Even though the temperature this summer has been record high, the Life Terra trees are growing and receiving the water and sustenance they need.

Life Terra's first Policy Event

On the 7th September 2021, Life Terra hosted its first Policy Event focusing on Forest Restoration and Tree-Planting – What impact for climate change mitigation?, with 216 participants listening to and interacting with experienced speakers.
