## Let's plant together

#climateactionnow

Sven Kallen - Founder Life Terra 17th of May 2021

#### Plant trees

#### Grow forests

- Climate Change is the greatest challenge of this century. If we don't take immediate action, the consequences will be disastrous for ecological and industrial systems alike.
- A mixture of solutions that limit & remove carbon emissions are necessary. Changes in the ways we generate energy, move around and eat will help limit future emissions.
- Carbon capture and storage technologies are important to develop, but still inefficient, unfit for scaling, and extremely expensive.

- Action is needed on many fronts, but reality is showing that industry and some governments are slow to act
- If we don't take immediate action, the consequences will be disastrous for ecological and industrial systems alike

A mixture of solutions that limit & remove carbon emissions are necessary

Changes in the w we generate ener move around and will help limit futu emissions

Changes in the ways we generate energy, move around and eat will help limit future emissions

Carbon capture a storage (CCS) technologies are important to deve but still inefficient for scaling, and extremely expense

Carbon capture and storage (CCS) technologies are important to develop, but still inefficient, unfit for scaling, and extremely expensive

Tree planting is the least expensi & most effective solution

Tree planting is the least expensive & most effective solution

\*The global tree restoration potential (Science Magazine); The trillion trees solution (Crowther Institute); Drawdown (Paul Hawken)

### About Life Terra: 500 million trees by 2025

Life Terra is a foundation with a mission to restore our connection with the Earth and to enable people to take impactful climate action now. We facilitate tree planting, educate future generations, and develop tree monitoring technology.

### Why trees?

- Planting trees is the most effective climate change option
- Planting 500 billion trees globally could remove 25% of existing carbon
- Big area's (twice the EU) are available for reforestation
- Requires limited political buy-in
- Modest financial investments
- It can be done now and everyone can get involved

\*Based on studies from special report <u>Climate Change and Land</u> (IPPC), <u>The global tree restoration potential</u> (Science Magazine); The <u>trillion trees</u> solution (Crowther Institute); <u>Drawdown</u> (Paul Hawken)

### Our goals for 2025

We are ambitious because we know that the world needs massive #climateactionnow

500

Million trees planted

3.536.423

Tons CO2 captured

<u>س</u> کے

### 1.350.000

Citizens participating

<u>م</u>

14.000

Classrooms participating

## Our objectives

Engage

Engage citizens and stakeholders to take action by facilitating tree planting

#### Connect

Connect participants through an innovative platform to streamline the planting process and scale up & out

#### Innovate

Innovate with monitoring and satellite technologies to provide citizens and specialists with transparent data on trees planted

#### Inspire

Inspire the next generation to thrive and face climate change challenges ahead through a unique environmental sustainability education program

### We support the UN Sustainable Development Goals

#### What makes us unique

**Plant** the right tree in the right place, share knowledge and expertise

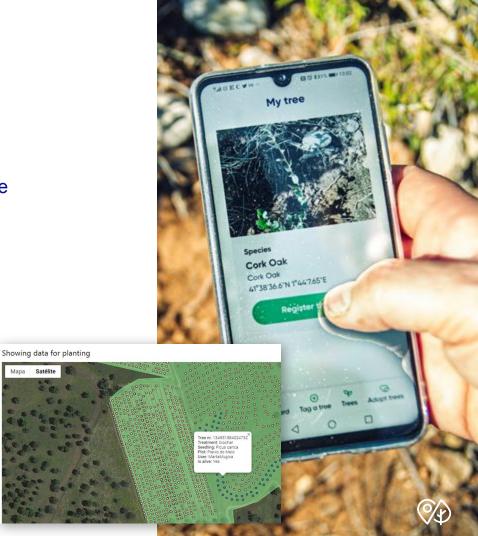

**Monitor** each tree planted, with our unique tracking system

**Educate** future generations, about sustainability and climate change

**Build** communities, because planting trees impacts society at large

### Strong pact

We are proud to work with a consortium of 16 partners from 8 EU countries that bring together expertise, knowledge and network in implementation, technology, education and communication. Our project is approved and supported by the European Commission through their LIFE programme.

#### Partner network growing fast

#### Life Terra's first planting season

## How is the project financed?

- This project was awarded €7 mln support by the LIFE Programme, which the consortium will use as seed money to put this ambitious initiative on the map.
- Multiple stakeholders support from companies, organisations and institutions
- Organically through the platform by adopting and gifting trees (€5 / tree or €6 / tree with event)

#### Social impact

- Engage citizens to plant trees
- Built communities
- Provide classrooms with our sustainability course
- Reach people via our platform and social media
- Receive Press mentions
- Create green jobs
- Train European nurseries in sustainable substrate production, expand use of professional plantings
- Reduce carbon emissions with our activities
- Provide a stimulus to the green economy
- Reconnect people with nature

#### Social media

#### **Objectives Social Media Activities**

- Grow brand awareness
- Build & Engage Audience
- Convert
- Retain & Amplify

Biodiversity

### **Publications**

**POTENTIAL REACH OF MEDIA: 110,596,463 impressions AD EQUIVALENCY: 188,640€** 

## Results first year (2020-2021)

#### Main KPIs

- 135.000+ trees (goal: 100.000)
- 70+ events (goal: 50)
- 8 countries (goal: 6)
- 50+ Terra Leaders trained (goal: 20)

## Challenges

- Difficult to organise and communicate planting events due to Covid-19
- As a consortium not able to meet in person and get to know each other
- Scale of the project
- Monitoring technology
- Generate funding
