## Recent Project Activities

### 19th country Sweden hosts the planting of Life Terra's 4 millionth tree

Life Terra's 4 millionth tree is now hosted in a tiny food forest in Lingilt, Sweden! Despite the intense drought that affected Sweden this past Spring, a variety of bigger trees could be planted on June 21st thanks to good soil preparation and irrigation. A nice variety consisting of Mulberry, Honeyberry, Amelanchier, Heartnut, Hazelnut, Pear, Rowan and Cherrybush is now in the ground!

With this planting event Sweden became the first Scandinavian country Life Terra is planting in, making it the 19th country in Europe at the end of the third season of the project. In October, another 250 trees will be planted together in the food forest with the local school. To read more and find more pictures from the symbolic event, click [here](#).

### Season 3 recap: a few figures

The Life Terra project is now into its fourth year, and the third season would not be complete without a short summary of the activities that took place. With a total of 3,455,819 trees of more than 330 different species planted over 539 events, season 3 was by far the most successful when it comes to the work on the field. Regarding the work done in the classrooms, the Terra Mission educational package recorded more than 5,800 new teachers committed to bringing climate awareness to their pupils. Lastly, more than 3,600 people registered on the Life Terra platform to follow the growth of the trees they planted. A great end of the season, we look forward to the next one!

## Wildfires: how treeplanting helps prevent them

Year after year, wildfires spread around our continent more broadly, especially in the areas of the Iberian Peninsula, Italy and the Balkans. Governments as well as the European Institutions [are rushing to cure this ever-spreading disease](#), but planting young trees can actually prevent it from happening in the future.

In this new entry on the Life Terra blog, we look into the various ways planting new trees can contribute to the prevention of future wildfires. You can give it a read [here](#).

## Looking for regular updates on Life Terra? Check the blog out

To keep up to date with the most recent news related to planting events, to the Terra Mission educational package as well as articles such as the one mentioned above, the best place to keep an eye on is the Life Terra blog. We update it regularly with all you have to know about Life Terra. [Don't miss out!](#)
