Let's plant together

Welcome to the December 2023 edition of the Life Terra Newsletter.

Have you ever adopted a tree? Check out our [website](#) and discover more about us!

Recent Project Activities

Life Terra lands in Lithuania: 20th country of the project!

The 20th European implementation country in Europe of the Life Terra project is Lithuania! Recently, a planting event took place in the Baltic country involving the young pupils of the [Vitlio Licėjus](#) school in Vilnius and with the collaboration of Myliu Miska. Life Terra also attended the [Agrifood forum](#), a conference based on addressing the multifaceted difficulties besetting the agri-food ecosystem. We are looking forward to continuing to plant in Lithuania as well as around the rest of Europe.

5000 trees planted in Italy during the Festa dell'albero

The Festa dell'albero is a yearly campaign organised by Legambiente, Life Terra's Italian consortium partner. Starting from 18 November, more than 140 schools, but also businesses, volunteers and local administrations from all over the country took action to make a difference for their community, by coming together to plant trees and take care of older trees. Much more information on the historic initiative is available [here](#).

Life Terra tree gifting at NSC

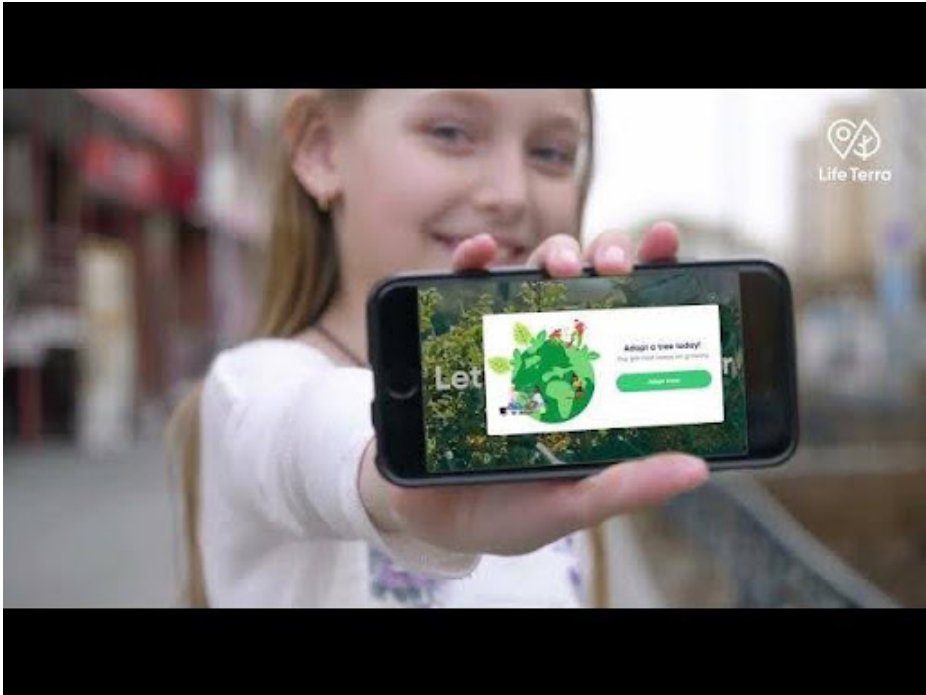

The National Sustainability Congress, in the Netherlands, is the longest-standing sustainability congress in the world. On 21 November, Life Terra partnered with the congress to gift a tree to each attendee, making them aware of our mission and exploring future possible partnerships. Do you know congresses outside of the Netherlands where Life Terra should be present or would you like to gift a tree to the participants of your next event? Drop us a message at contact@lifeterra.eu.

Euractiv Special Report: carbon removals in Europe

The EU is trying to continuously step up its game when it comes to preventing drastic global warming - including with its management of forests. Euractiv explored the EU's Nature Restoration Law and Carbon Removals Certification Framework in its latest Special Report, to try and gain insight into the Union's strategy for the protection and restoration of the continent's forests. You can find all 6 stories of the Special Report [here](#).

At Life Terra, we want to be transparent not only in the number of trees planted during the project but also with the success of these reforestations!

This is why we regularly monitor some of the most representative planting sites of a particular region.

Life Terra's tree-planting project in Ehreshoven, Germany shows promising results! Despite the challenges of drought and tree mortality, our "climate forest" of 19,500 trees is thriving. With a survival rate of over 95%, these resilient Spanish saplings are adapting well to the changing climate and soil conditions.

Check out some pictures of the current situation below! 🌿🌿

CLIMATE FOREST

Goal: creating a stable mixed forest that is expected to adapt much better to the changing climate conditions in this region.

**lifeterra_europe** Miyawaki forest in North-East of France is thriving 🌿🌿

In February 2023, we supported the plantation of a Miyawaki mini-forest in the North-East of France.

🌿 1,500 trees were planted with 235 schoolchildren and citizens of the local community of Nomeny.

A few weeks ago, our partner Jean-Baptiste (JB) Chaudron from Restore Forest made a monitoring and maintenance visit.

🌿 And the results are great! Trees are growing and survived the dry summer thanks to heavy mulching. In a second plot some older trees...

Rozas (Madrid) to boost biodiversity and increase the landscape value which is frequented by pedestrians & cyclists.

Thanks for your commitment & passion. It was great to see such enthusiasm in the field! 🌿

community-based tree-planting initiatives

And this is what we did last November 27 next to R2M Spain.

More than 20 enthusiastic employees planted trees in Las Rozas (Madrid) to boost biodiversity in the area and increase the landscape value which is frequented by pedestrians 🚶 and cyclists 🚲.

🙌 Thanks to R2M for their commitment and passion for the environment.

It was great to see such enthusiasm in the field! 🌿
