Recent Project Activities

Life Terra is now active in Luxembourg and Armenia

Life Terra is expanding its activities! At the end of March, Life Terra reached its 22nd European country: Luxembourg! Our team of volunteers planted 1,850 trees in Winchange, helping transform a land affected by the bark beetle into a biodiverse forest, hosting 18 different species. Thank you to everyone who made this happen!

Another milestone was planting our first symbolic tree in Armenia! Last month we established a collaboration with My Forest Armenia and funded the planting of 3,000 trees.

The team also took part in a conference in Yerevan to talk about nature-positive credits and ecosystem services, and visited planting and nursery locations in Lori region. Special thanks to the whole My Forest Armenia team for their hospitality and commitment to creating new forests.

Elisa Toffoli kickstarts Festa dell'Albero

On March 21st, Life Terra welcomed artist Elisa Toffoli to symbolically kick off the planting of 65 trees in the Lower Isonzo Agricultural Park, along with pupils of the Arcobaleno primary school. That area of the Veneto region has been rescued from land consumption and cementification; multiple organisations are now leading the efforts towards regeneration.

This event was just the beginning of a series of tree-planting events that will continue until next autumn in various Italian cities. Special thanks to the Music for the Planet fundraiser, which will make Italian cities greener! Read more [here](#).

Euractiv's Special Report: An interview with Emma Wiesner

Euractiv has published the first article of its new Special Report for Life Terra: an interview with Emma Wiesner. Wiesner, a Swedish EU lawmaker in the liberal Renew Europe Group, successfully co-negotiated a “world-first” agreement on standards for carbon removal. This has paved the way for carbon capture to help deliver on global net zero climate targets. You can read the whole interview [here](#).

Save the date: Euractiv Twitter Chat on April 30th

Do you want to give your point of view on environmental topics to an audience of European stakeholders, journalists and activists? Do you want to learn more about their views? Then join Euractiv's Twitter Chat on April 30th and take part in the

New video: Life Terra presents Carbon Removal Credits

Partnership Spotlight

Search the web with Volte!

What if we told you that you can support Life Terra every time you search the Internet? You can actually do this with [Volte's search engine](#), which helps non-profit organisations raise money through search ads. When searching the Internet with Volte

since February 2023. All the money raised will be donated to the project periodically to support planting projects and other activities.

You can support us by downloading the Volte extension for Chrome [here](#).

First EnefirstPlus survey by IEECP

The new EnefirstPlus project aims to give European stakeholders the necessary technical support to implement energy efficiency improvements. The project is now getting underway and the first survey is out, to understand the stakeholder's usage of Energy Efficiency First activities.

Check out the survey [here](#) and give the project your answers! And to learn more about the project, click [here](#).

Happy #earthday 🌱

Today, we celebrate our planet and its beauty. But let's also remember, that every day is Earth Day!

Climate change is real, and it's time to act. It's crucial to shift our focus from just one day of celebration to a daily commitment to sustainability. By adopting eco-friendly habits and reducing our #carbonfootprint, we can make a real difference!

Giving back to the Earth by #plantingtrees is our favourite solution! Join us in embracing a #sustainablelifestyle and making every day Earth Day 🌱

The social media post features a collage of nature-related images. On the left, there's a close-up of purple flowers with the text 'Earth day is every day' overlaid in a white, serif font. On the right, there are two smaller images: one showing a lush green field with trees in the background, and another showing a close-up of a tree trunk.
