

Andyamo - video demonstrating how the application works

Keolis Lyon, Andyamo, Sytral Mobilités et Hove

Search for a route.

Activate the « reduced mobility user » option.

Only results with a full accessibility are now displayed.

Accessibility of the public transport line is guaranteed.

Also accessibility of stops (up & down).

Public transport and walking are inseparable... so.

Pedestrian routes are also fully adapted to guide precisely to the accessible stop.

With the precision of sidewalks, pedestrian crossings, stairs, urban lifts...

The guarantee of accessible sidewalks (large enough, slope $<4^\circ$, good pavement, no fixed obstacles...).

Accessible crossings (flat curbs).

Textual instructions are also displayed to facilitate guidance.

« Continue straight on the next crossing in 9 m »

« Turn right on Rue du Repos in 54 m »
