Redefine Yourself

As the season changes, new leaves appear, beautiful flowers bloom and the grasses become greener. This is nature's way of reminding us that change is beautiful and we can always redefine ourselves. Embrace the new season as a chance to make changes that would beautifully redefine you!- *Dr. Sulyman-Scott*

Procedure Highlights

- Surgical Chin Augmentation
- Non-Surgical Jawline Contouring
- CO2 Laser Resurfacing

What's New?

- Mentorship
- ASPIRE-Reward Program

Skin Care Spotlight

Ultra Smoothing Pore Refiner

Spring Skincare Tips

- Redefine your skincare from Winter to Spring

"Healthy skin does not happen overnight."

Surgical Chin Augmentation

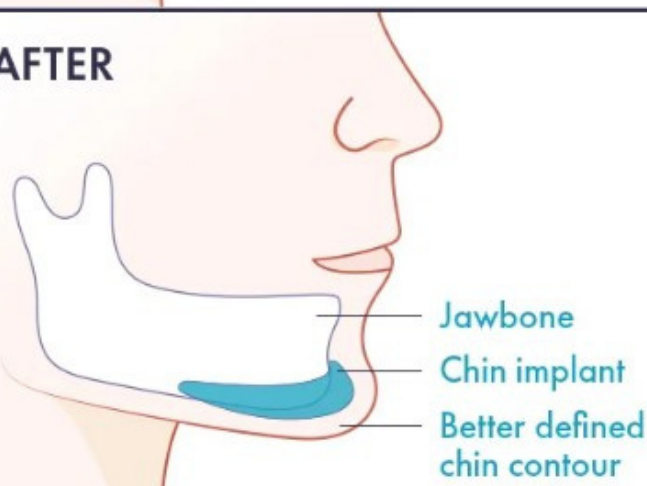

Chin Augmentation is a surgical procedure in which a chin implant is used to enhance the projection, size or shape of your chin. The procedure improves contours of the chin, neck and jawline. This procedure can be performed in clinic. Strenuous activity should be avoided for two weeks, but you should be able to return to work or other activities in a few days.

BEFORE

AFTER

Chin Augmentation can:

- Minimize the appearance of a “double chin”
- Improve facial profile and symmetry.
- Create a more defined jawline
- Make your chin and jawline more symmetrical
- Enhance balance between nose and the chin.

Non-Surgical Jawline Contouring

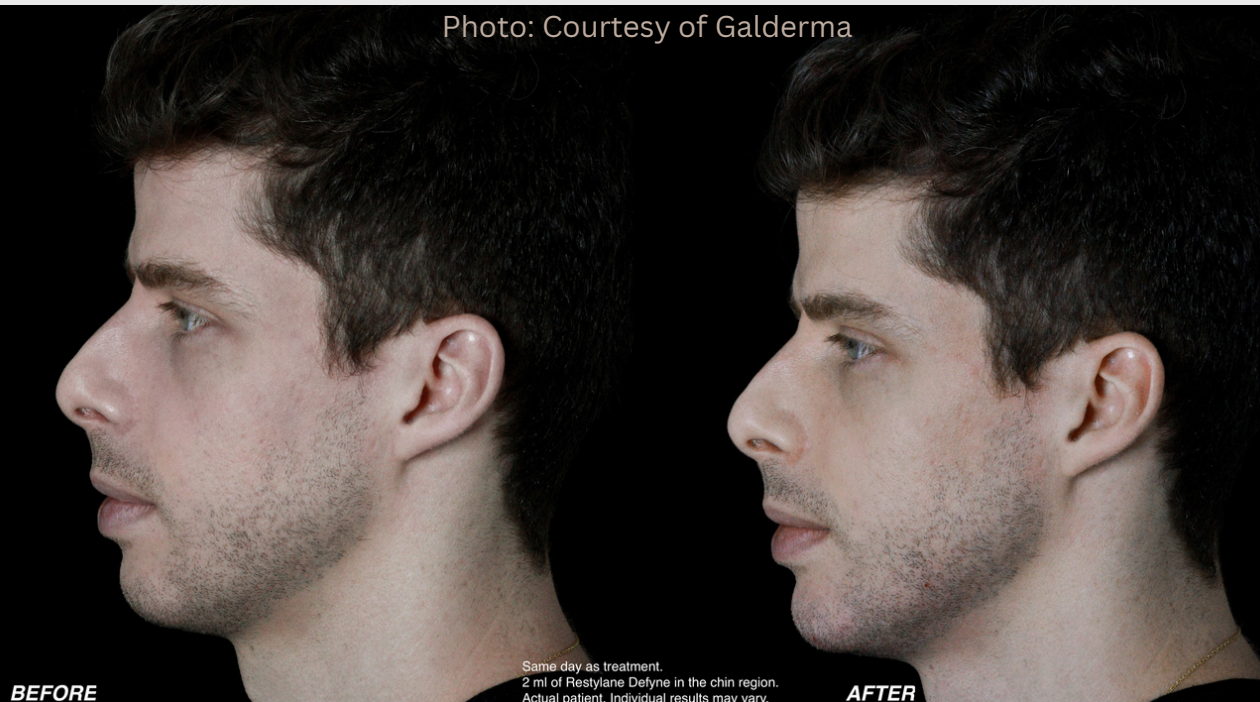

Injectable treatments with dermal fillers, for both men and women can help achieve a more define jawline without surgery.

Photo: aesthetics journal

Jawline fillers can add definition, symmetry, balance, or contour to this area, especially in profile.

Photo: Courtesy of Galderma

Same day as treatment.
2 ml of Restylane Defyne in the chin region.
Actual patient. Individual results may vary.

CO2 Laser Resurfacing

CO2 Laser Resurfacing is done in the clinic using a fractionated CO2 laser. The treatment leads to turnover of the skin while increasing collagen and elastin production. This results in a more youthful, tighter, healthier appearing skin.

Before

After

1 month after CO2 laser treatment. Patient experienced improved skin tone, texture and tightness.

Skin Care

SPRING TIPS FOR SKINCARE

Redefine your skincare from Winter to Spring

- 01 Start to Exfoliate
- 02 Switch to Lighter Moisturizer
- 03 Continue Antioxidants
- 04 Upgrade SPF

1. Exfoliation helps to brighten dull skin.
2. With temperature/humidity increasing, a lighter moisturizer is better for absorption.
3. Topical antioxidants are essential for your skin, as they help to prevent the clinical signs of UV damage, premature aging and decrease the breakdown of collagen and elastin.
4. Upgrade SPF, increase to an SPF of at least 50+.

What's New?

Mentorship Program

Maneuvering the complexities of our health system doesn't come with a how-to manual. Mentorship is a way for our next generation of healthcare providers to receive valuable information and training not found in textbooks.

Dr. Sulyman-Scott is proud to be a mentor for students and medical residents. Dr. Sulyman-Scott provides a unique perspective for students to learn about healthcare. With her extensive experience as a former register nurse, surgeon and founder of That Face- our students will learn about the healthcare system, ethics, values and the importance of being patient focus. Mentees are assisted with learning the art, science and research in the aesthetic industry.

Occasionally you may see a mentee shadowing Dr. Sulyman-Scott, their role is strictly observatory. Our patients will always be our main priority and we are truly grateful to you for allowing our mentees to learn from your care.

*Don't just take our word for it.
Read what our patients have to say about
That Face.*

I have had the most wonderful experiences with Dr Sulyman- Scott and her team. Had my eyelids done in clinic and I was completely confident every step of the way. Very relaxed, pain-free, and comfortable and I'm loving the results! And it's only one week out! I'm excited and looking more and more like myself. My youthful self. This is my second surgical procedure with the Team and I wouldn't go anywhere else. I trust them fully and completely. And I thank you Dr Sulyman for your dedication and sharing your skills

Patient Feedback

My consultation was very thorough. Dr is such a joy. Love the staff as well.
