## Create Balance

Balance is the only way to maintain harmony and well being in life. While we all strive to find balance, it is important to remember that sometimes balance needs to be created. Your face is no different than life. In order to achieve and maintain an harmonious aesthetic, your facial features need to complement each other as one traverses the contours of your face. My goal is to help you create balance while highlighting your natural beauty!- *Dr. Sulyman-Scott*

### Procedure Highlights

#### Facial Rebalancing

- Surgical: Fat Transfer
- Non-Surgical: Dermal Fillers

### Skin Care Spotlight

Restorative Skin Complex  
with TriHex Technology®

### What's New?

- That Face went to Vegas
- June Promotion

*"I really regret taking  
good care of my skin...."  
-said no one EVER!"*

# Surgical

## Facial Fat Transfer

Facial fat transfer, also known as facial fat grafting or "fat injections," is a surgical procedure that involves the extraction and transfer of fat from one area of the body to the face.

It is primarily used to restore volume, contour, and rejuvenate the face by addressing signs of aging or facial asymmetry.

The procedure typically begins with the extraction of fat from donor sites on the body, such as the abdomen or thighs, through liposuction.

The extracted fat is then processed to purify and prepare it for transfer. Once prepared, the fat is carefully injected into specific areas of the face, such as the cheeks, temples, jawline, or under-eye area, to restore volume and enhance facial features.

# Are you a candidate for Facial Fat Transfer?

Both men and women who are looking to address concerns such as:

- Hollowness (atrophy) in the cheeks
- A sunken appearance under the eyes
- Marionette lines
- Forehead lines
- Wrinkles, creases, or deep folds in certain facial areas
- Loss of volume in the lips
- Loss of volume/fullness in the jawline area
- Loss of volume in the temples
- Mild scarring/deformities

# Non-Surgical Dermal Fillers

**Dermal Fillers can provide various benefits such as:**

- Restoring Volume
- Smoothing Wrinkles & Lines
- Enhancing Facial Contour

# Non-Surgical Dermal Fillers

## **Dermal fillers are right for you if you desire the following:**

- Fillers can help diminish the appearance of fine lines, wrinkles, and folds by plumping the skin from underneath. Smooth out lines around nose and mouth ( marionette lines/ smile lines)
- Enhance & restore volume to sunken cheeks or temples
- Diminish vertical lip lines
- Plump & enhance the lips
- Smooth out a chin crease
- Improve symmetry among facial features

### ***Dermal Fillers are a non-invasive treatment.***

The effects of dermal fillers are not permanent and can last from several months to over a year, depending on the type of filler used and individual factors. Repeat treatments are often necessary to maintain the desired results.

# Skin Care Spotlight

## ALASTIN

### *Restorative Skin Complex with TriHex Technology*

*Helps combat all signs of aging – from dullness to volume loss – to brighten the complexion and lift the skin for a more youthful glow!*

1. As we age, we lose collagen and elastin, we also breakdown more collagen than we produce. This is where TriHex technology shines. It's a potent blend of peptides that clears the old broken down collagen and elastin, while simultaneously supporting the production of NEW collagen and elastin.

2. Antioxidants- Why use an anti-aging product that isn't going to reduce oxidative stressors?

3. Plumping- Full face youth restoration. Hexapeptide38 is the magic here. Working in the background to support healthy adipocyte cells.

## VEGAS COSMETIC SURGERY

REIMAGINED. REJUVENATED. REFRESHED.

In June,  
That Face traveled to Vegas

At That Face we strive to be at the forefront of science and be a part of the newest aesthetic techniques. The That Face team attended the Vegas Cosmetic Conference, where Dr. Sulyman-Scott presented her experience and techniques on "Bespoke lip reduction and contouring".

We were thrilled to gather new knowledge and advanced techniques for surgical and non-surgical treatments. Our mission is to always provide our patients with safe, proven and cutting edge treatments.
