Rediscover You

The hustle and bustle of a busy life can stifle our sense of self. It is easy to get lost in the demands of our to-do lists and summer activities. Today is a great day to take a pause to remember who you are. Does your outside match how you feel on the inside? Do you recognize the face you see in the mirror? To rediscover you is to rediscover your complete self guilt free. You are worthy of self re-discovery! -Dr. Sulyman-Scott

- Surgical: Face Lift
- Non-Surgical: Microneedling +RF

"Filters are great, But great skin is BETTER!"

A Facelift primarily focuses on improving the contour and tissue sagging of the Mid to Lower Face. A Neck Lift can be done in conjunction and improve contour of the neck.

During a facelift, Dr. Sulyman-Scott lifts and tightens the underlying facial muscles and tissues, removes excess skin, and repositions the skin to create a more youthful and rejuvenated appearance. The procedure can target various areas, including the cheeks, jowls, jawline, and neck, depending on the patient's specific concerns and desired outcome.

Dr. Sulyman-Scott uses techniques that involve shorter incisions, which heal more quickly and leave less visible scars. You can expect to take one to two weeks off from your usual social activities

Results can last up to 10 years depending on what technique is used and how your facial tissue ages.

JULN 2023

Surgical Facelift

• • • •

Aging can create several changes to the Face such as:

- It creates folds, contours, and shadows that make us look tired, stressed, and simply older.
- The heart-shaped face of youth becomes more rectangular as the jowls widen and change the appearance of the jawline, which loses its definition.

Surgical Mini Facelift

A mini facelift is a similar procedure to a traditional facelift, but it targets a more precise area of the face and requires smaller incisions. The mini facelift lifts and sculpts the mid and lower areas of the face, including the cheeks and jawline.

The mini facelift is not for everybody; individuals with excessive skin laxity will need a standard facelift for optimal results.

Enhance Your Face/Mini lift With The FollowingProcedures:

- Facial Fat Transfer
- Neck Liposuction
- Neck Lift
- Eyelid Surgery
- Microneedling+RF
- CO2 Laser Treatment

Non-Surgical Microneedling with RF

In simple terms, Microneedling with Radiofrequency is a procedure where very small needles are used to make tiny punctures in your skin, and heat energy is applied to boost the production of proteins that keep your skin looking youthful and smooth. This process encourages your skin to produce more collagen and elastin, leading to improvements in skin texture, firmness, pigmentation and a reduction in the appearance of wrinkles, scars, and enlarged pores.

Non-Surgical PDO Threads

PDO Thread Lift: This procedure involves inserting dissolvable threads into the skin, which are then lifted to provide a subtle lifting effect. Thread lifts improve tissue sagging, stimulate collagen production and enhances facial contours.

For optimal results for a Non-Surgical Facelift, patients choose to do a combo of Mirconeedling + RF with PDO Thread Lift.

What's New?

· · · ·

We are delighted to offer skin care consultations with our nurse, Taylor.

Taylor, specializes in personalized skin care solutions that cater to your unique needs. Benefits of the consultation is to identify underlying issues like acne, dryness, sun damage, or signs of aging that may require a targeted comprehensive treatment plan.

This assessment helps determine the best treatment plan and ensures you're addressing the root causes of your concerns. This can save you time, money, and the potential frustration of trial and error.

I want to take a moment to express my deep gratitude and genuine excitement about being a part of your future skincare transformation. Together, we will achieve and maintain the healthy, radiant skin you desire.

Taylor, RN
