Synergy

Navigating our world today can be very challenging as our senses easily become overloaded. We are sometimes forced to make one choice and at other times we suffer from complete choice paralysis. Life gets more beautiful when we become adventurous in our choices and unleash the untapped potential of choosing more than one thing. You deserve to enjoy life to its fullest, afterall you are greater than the sum of your parts! -Dr. Sulyman-Scott

Scar Revision

Scar revision is a general term for cosmetic procedures used to reduce or adjust the appearance of scars. Making it less noticeable and more consistent with the surrounding skin texture and color.

Here are some common types of scars that Dr. Sulyman-Scott can address:

- **Hypertrophic Scars**
- **Keloid Scars**
- **Atrophic Scars**
- **Contracture Scars**
- **Surgical Scars**
- **Acne Scars**
- **Traumatic Scars**

The specifics of your scar revision will depend on the nature of your scar and how it can be camouflaged. In some cases, for optimal results surgical and non-surgical procedures have to be combined.

Surgical Scar Revision

- **Excision** – One option for surgical scar revision is to excise the scar. In this procedure, Dr. Sulyman-Scott will remove as much scar tissue as possible and close the adjacent skin with sutures.
- **Orientation Adjustment** – During this treatment, Dr. Sulyman-Scott will reorient the scar to place it between the natural creases of the face. This will make the scar less noticeable and less likely to become wider.
- **Breaking Up the Scar** – In the case of a long linear scar, Dr. Sulyman-Scott can break the scar up using geometric patterns. This will make the scar significantly less noticeable.
- **Fat Transfer**– Sometimes, a scar can cause a significant depression in an area. In these cases, fat transfer can help improve the contour of the area and restore harmony.

Scar Revision

Surgical: Geometric Scar Revision

The redness will fade away and the scar will go from a wider raised scar to an inconspicuous thin and flat scar.

*Non-Surgical: Co2 laser treatment
for facial acne scarring.*

Non-Surgical Scar Revision

- **Steroid Injections** – One effective option for patients interested in non-surgical scar revision is steroid injections. A corticosteroid solution can significantly shrink its size when injected into a hypertrophic or keloid scar.
- **Microneedling** – To treat acne scarring, microneedling is a great option. It involves penetrating the skin with tiny needles, which trigger the body's healing response and rejuvenates the skin.
- **VIVACE** – Microneedling with radiofrequency is another excellent treatment for acne scarring. When radiofrequency energy is added to the microneedling process, it helps create quicker, more powerful results by stimulating collagen and elastin production.
- **CO2 Laser Treatment** – Laser scar treatment, also known as laser resurfacing, is a procedure that reduces scarring by removing skin layers, allowing the body to generate new, smoother, and brighter skin. The treatment also stimulates collagen production, improving the treated skin's texture.

Skin Care Spotlight

Regenerating Skin Nectar with TriHex Technology®

DESIGNED TO COMPLEMENT:

- Lasers
 - Chemical Peels
 - Microneedling
 - Facial Surgery
- Calms post-procedure skin and helps reduce recovery time with Arnica, Phytoene, Phytofluene, and Narigenin with Panthenyl Triacetate.
 - Helps strengthen skin ahead of cosmetic treatments to improve the appearance of smoother, brighter, more youthful-looking skin afterward.
 - Water-free, preservative-free, and bacteriostatic formulation.
 - Includes TriHex Technology® to support the production of new, healthy elastin and collagen.
 - Winner of SHAPE "Best Healing Skin Treatment" 2021 Award.

*Don't just take our word for it.
Read what our patients have to say about
That Face.*

Dr S is understanding about what I want and is precise and detailed while performing her work. Just the best I've had so far. FINALLY !! I can say that I will be satisfied with my nose now 😊 I will definitely consider this place for any other procedure I have in mind

Patient
Feedback

The bedside manner of the entire medical staff is remarkable and truly makes you feel noticed and heard. They are honest and open with their feedback as well, especially if you are considering pursuing a treatment or procedure that actually isn't advisable for you.
