Get Lifted

We all feel the figurative and physical downward pull of gravity. "What goes up must come down" does not imply that it cannot be returned to an elevated space. No matter what you have been through, you deserve to vibrate on higher levels. It's time to get lifted!-Dr. Sulyman-Scott

"Nature gives you the face you have at 20; it is up to you to merit the face you have at 50" - Coco Chanel

Understanding the Effects of Rapid Weight Loss on Your Face

Rapid weight loss often leads to a condition colloquially known as the "Ozempic Face." This term refers to the accelerated facial aging that can occur as a result of significant weight loss.

Key symptoms:

- A gaunt appearance
- Loss of facial fat/volume
- Noticeable sagging of facial tissues.

At That Face, we understand the concerns that come with such a transformation, and we're here to help you explore your options for rejuvenating your appearance and boosting your confidence with **L.iF.T**

Surgical

L.iF.T

L= Lift with Surgery

Facelift

- A Facelift can effectively address sagging skin, which is a common concern in cases of the "Ozempic Face." The procedure involves removing excess skin and tightening the remaining skin to create a smoother and more youthful appearance.
- Facelift surgery can target various areas, including the cheeks, jowls, jawline, and neck, depending on the patient's specific concerns and desired outcome. By repositioning the underlying tissues, a facelift can create a more rejuvenated appearance.

Non-Surgical

L.iF.T

L= Lift with PDO Threads

Before

After

The mechanism behind PDO Threads involves prompting your body to generate collagen in the treated area. While the threads themselves are eventually absorbed by the body over a few months, the newly formed collagen remains, delivering lasting volume and lift. It's the perfect choice for those not quite ready for a facelift but seeking instant results.

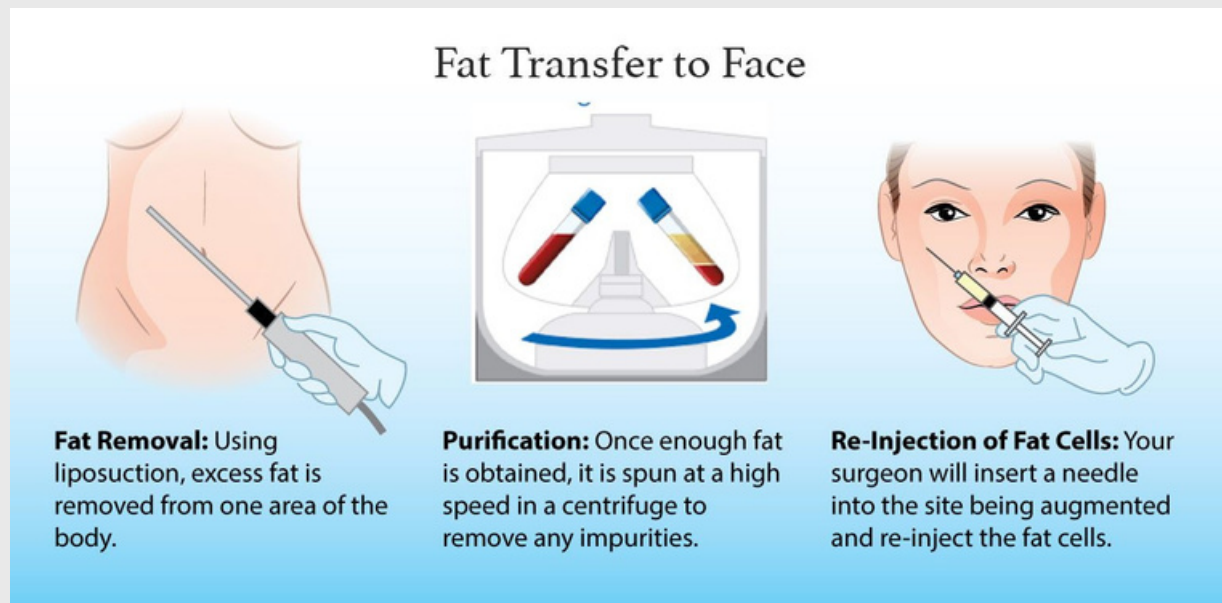

Surgical

L.iF.T

iF = inject Fat

Facial fat transfer, also known as facial fat grafting or "fat injections," is a surgical procedure that involves the extraction and transfer of fat from one area of the body to the face.

- Fat transfer can effectively restore lost facial volume, which is a common issue in cases of significant weight loss, leading to the appearance of a gaunt or hollowed face
- Since your body's own fat is used in the procedure, the results tend to look and feel natural.
- Transferred fat typically integrates with the existing tissues and while some fat may be reabsorbed by the body over time, a significant portion usually remains, offering long-lasting results.

Non-Surgical

L.iF.T

iF = inject Filler

Dermal fillers are designed to add volume to areas that have experienced volume loss due to aging or significant weight loss.

- Filler injections can help plump up areas such as the cheeks, temples, and under-eye hollows, addressing the gaunt appearance often associated with the "Ozempic Face."
- Fillers provide immediate results, restoring the natural curves and contours of the face

Non-Surgical

L.iF.T

T = Tighten with Vivace
(Microneedling with Radiofrequency)

- RF energy delivers controlled heat to the deeper layers of the skin, promoting collagen production and tissue tightening.
- This can help reduce sagging and improve the elasticity of the skin, addressing the gaunt appearance often associated with the "Ozempic Face."
- Microneedling creates tiny micro-injuries in the skin, triggering the body's natural healing response and stimulating collagen production.

ALASTIN

Restorative Skin Complex with TriHex Technology

Restorative Skin Complex helps **restore volume to thinning skin and to improve elasticity**. Also, includes TriHex Technology® to support the production of new, healthy elastin and collagen.

Alastin verified buyer feedback

I like Restorative Skin Complex
My skin is fuller, healthier, plumper because of using Restorative Skin Complex in the morning and at night. If I work out and wash my face during the day, I always reapply. My skin feels clean and fresh after applying. The cost is so worth the results and I highly recommend this product.
