Message Gratitude

We watched as the summer days faded away and the leaves turned from lucious green to beautiful rustic shades of orange. While you may not always feel the serenity that comes with contentment, you can always find joy in any situation by acknowledging your blessings, no matter how small they may seem. As this season strengthens our feelings of gratitude, I want you to know that I am truly grateful for you and the value you add to my life. -Dr. Sulyman-Scott

Your Guide to Combatting Facial Wrinkles

Aging is a natural part of life, and it can bring unwanted facial wrinkles. Fortunately, advancements in facial rejuvenation techniques such as a Neurotoxin (Botox, Dysport, Xeomin), CO2 laser treatments and facial plastic surgery (facelift, neck lift, eyelid lift) offer hope to those seeking to maintain a youthful appearance.

It's essential to understand the different types of facial wrinkles:

- **Dynamic Wrinkles:** These wrinkles result from repetitive muscle movements over time, such as smiling, frowning, or squinting. The most common dynamic wrinkles are crow's feet (around the eyes), forehead lines, and frown lines between the eyebrows.
- **Static Wrinkles:** These wrinkles are visible even when the face is at rest and are primarily caused by a loss of collagen and elastin in the skin. Nasolabial folds, marionette lines, and neck wrinkles are examples of static wrinkles.

Surgical

For those seeking a more comprehensive and long-lasting solution, facial plastic surgery can address both dynamic and static wrinkles. Procedures like **facelifts**, **brow lifts**, and **eyelid surgery** can reverse the effects of aging, giving you a more youthful appearance.

Lower Facelift & Neck Lift

Upper Eyelid Surgery

Non-Surgical CO2 Laser for Wrinkles

CO2 laser treatments are effective for treating static wrinkles by promoting collagen production and removing damaged skin layers. This innovative technology provides a rejuvenated, smoother, and more youthful complexion.

***Results: One CO2 Laser Treatment
No Frown Line***

Non-Surgical Neurotoxin for Wrinkles

Before

After

Neurotoxin (Botox, Dysport and Xeomin) injection is a non-invasive treatment that temporarily paralyzes or weakens the muscles responsible for dynamic wrinkles. This prevents further creasing and smooths out existing wrinkles. The treatment offers results within a few days and no downtime.

After

Skin Care Spotlight

Alastin-Renewal Retinol

Benefits of using Retinol

- Reducing signs of aging and wrinkling.
- Smoothing skin texture and encouraging the stimulation of collagen.
- Correcting photoaging (sun damage).
- Reducing discoloration that has already been deposited onto the skin.
- Calming problematic skin (acne).

Verified customer review:

Doris: **Excellent**

I am 42 yrs old with dry, sensitive and dehydrated skin I also have rosacea. Even though I have those condition I don't have any wrinkles only expressions lines. This product is absolutely wonderful I have been using the moisturizer, retinol and their sunscreen.

Galderma Training

That Face was excited to host the Galderma Training, where our Nurse Taylor and other providers received additional training led by Rana, RN. With over 25 years of experience, Rana actively participates in national and international educational programs. Companies like Allergan, Galderma, Revance, and P.A.L.E.T.T.E Resources value her expertise in speaking and training. We were thrilled to have her at the Galderma Training event.

*Don't just take our word for it.
Read what our patients have to say about
That Face.*

I always been super scared of needles but Dr. Sulyman-Scott comforted me and made me feel really safe and secure during my filler treatment. She has safe hands and was really patient with me.

Patient
Feedback

Excellent care with welcoming, personal attention. Early results promising.
