JANUARY 2024

## Message

### Who are you?

Do you confidently know who you are? A new year should not bring the false promise of a "new you", instead it should open your mind to more opportunities for self discovery and growth. You should remain steadfast in proudly displaying the beautiful features that make you unique. I see you and appreciate you for the beautiful person that you are! -Dr. Sulyman-Scott

# Rediscover Confidence in Every Detail

At That Face Facial Plastic Surgery, we understand the importance of feeling confident and comfortable in your own skin. This month we shine a spotlight on the transformative possibilities for one of the most distinctive, yet forgotten features of your face - your ears!

---

Let's explore ways to enhance your natural beauty.

# Surgical Earlobe Repair

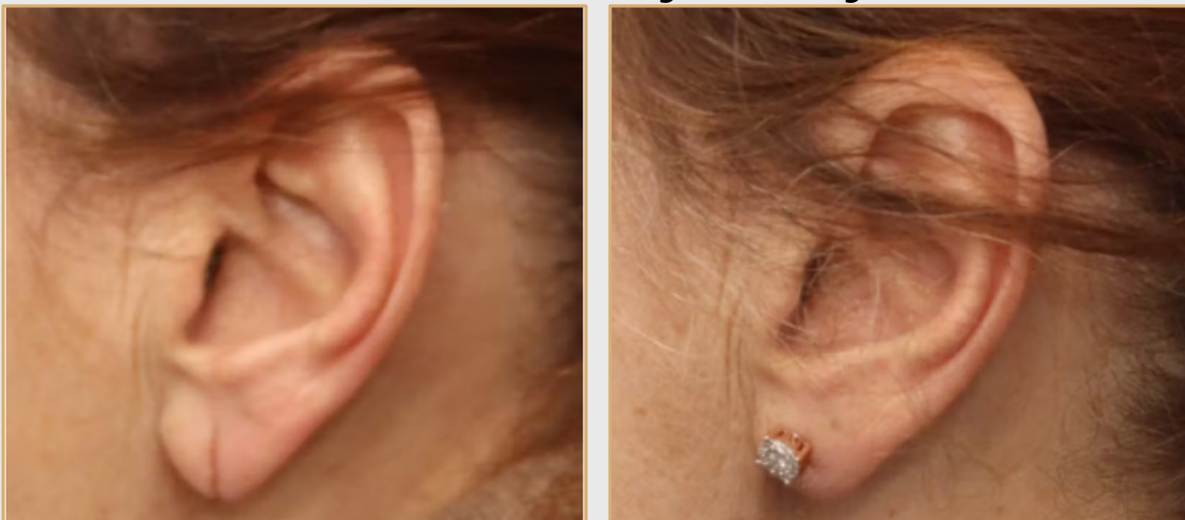

Are you troubled by torn or elongated earlobes? Our Earlobe Repair procedure is designed to restore symmetry and shape to your earlobes.

Over time, earlobes may experience changes due to factors like heavy earrings, trauma, or the natural aging process.

If you're experiencing elongated or torn earlobes, Dr. Sulyman-Scott can skillfully perform earlobe repair procedures. This quick and minimally invasive in-clinic surgery can restore the natural shape of your earlobes, allowing you to confidently showcase your favorite earrings once again.

## Rediscover Symmetry

*5 months after a left earlobe repair of a complete earlobe tear. We repierced the earlobe 4 months after the repair.*

# Surgical

## Otoplasty (Ear Pinning)

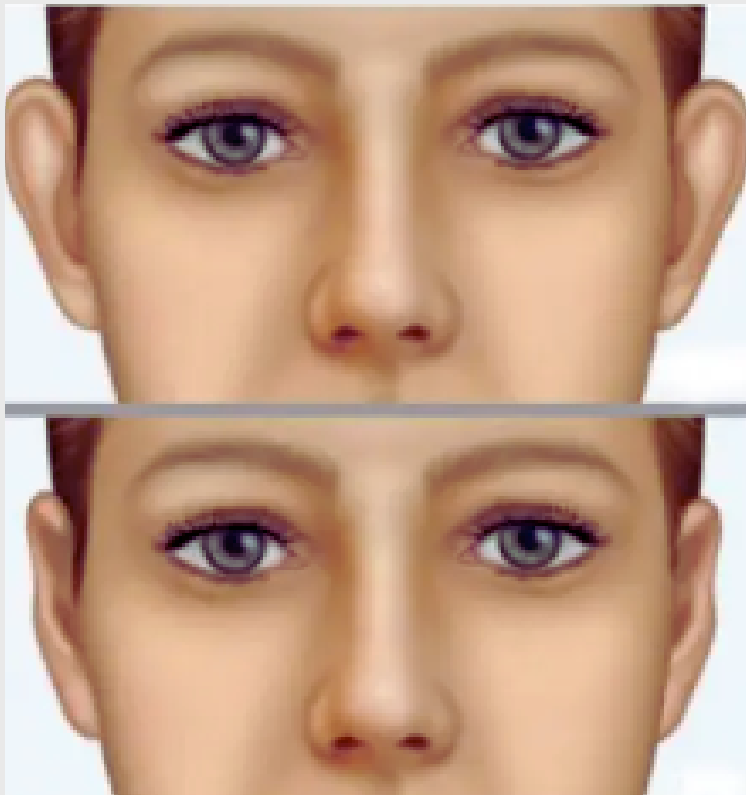

Otoplasty surgery is an excellent option to adjust the shape, symmetry, size, or position of your ears. This is done by adjusting the cartilage of the outer ear.

Otoplasty may also be suitable if you were born with a defect in shape or cartilage.

Whether you're looking to reduce prominence, correct asymmetry, or enhance overall facial harmony, Dr. Sulyman-Scott can tailor an otoplasty procedure to meet your unique aesthetic goals and it can be done in-clinic using local anesthetic.

# Non-Surgical Dermal Filler

For those seeking a non-surgical option, consider earlobe filler treatments. As we age, our earlobes can lose volume and firmness, making them appear droopy or deflated. Dermal fillers restore volume, smooth out wrinkles, and rejuvenate your earlobes.

***Subtle yet transformative enhancement***

*Don't just take our word for it.  
Read what our patients have to say about  
That Face.*

As an ethnic girl from Colorado looking for an upper lip reduction, I was very intentional about the doctor I wanted for my procedure; I'm glad I traveled to Chicago to work with her. She strived to make my procedure as comfortable as possible; her attention to detail & technique is impeccable.

Patient  
Feedback

Best face Doctor  
In Chicago! She  
gets the job  
done perfectly!
