Options for Facial Rejuvenation

Smooth, resilient, and firm skin is often celebrated as a timeless indication of well-being and aesthetic appeal.

However, as time progresses, the natural aging process may gradually manifest in changes to your skin's appearance, including the emergence of fine lines, wrinkles, and a reduction in firmness. These alterations, while a natural part of life's journey, may evoke a desire to rejuvenate and restore the radiance of youth.

Explore treatment options for lower face rejuvenation and regain a vibrant, refreshed appearance.

Surgical

Lower Face Lift (mini facelift)

As we age, the lower face can start to show signs of aging such as sagging skin, jowls, and loss of definition along the jawline. A Lower Face Lift, also known as a mini facelift, is a surgical procedure designed to address these concerns and restore a more youthful appearance. A Lower Facelift sculpts the lower areas of the face, which include the lower cheeks, jowls, and jawline. Because it targets specific areas of the face, this reduces the surgical trauma to a wide area, and thus results in a shorter recovery period.

Before

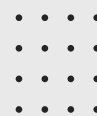

After

Key benefits of the Lower Face Lift include:

- Improved jawline definition
- Reduction of jowls and excess skin
- Smoother, more youthful appearance
- Long-lasting results

The results of a Lower Face Lift can be enhanced with Vivace to improve the skin quality.

Non-Surgical

VIVACE-Microneedling with RF

We acknowledge that surgery may not be the ideal option for everyone. For those seeking lower face rejuvenation, Vivace presents an alternative. Vivace employs radiofrequency microneedling technology to encourage collagen generation and firm the skin, resulting in diminished wrinkles, fine lines, and sagging in the lower face and neck region. This minimally invasive procedure delivers impressive outcomes with minimal downtime. For enhanced results Vivace can be combined with other non-surgical treatments .

3 sessions of Vivace resulted in improved skin tone and texture. Tightening of her neck, jawline and jowls.

Vivace Direct Featuring Dr. Sulyman-Scott

We're thrilled to share that Dr. Sulyman-Scott, has been featured by Vivace for her expertise in **Treating Darker Fitzpatrick Skin Types.**

Courtesy of Vivace

After 1 Vivace session (Microneedling with RF)- resulted in a more even complexion and reduced the appearance of forehead wrinkles.

As a black Facial Plastic Surgeon, Dr. Sulyman-Scott draws from personal experiences with dark skin tones, enabling her to deeply understand her patients' concerns and provide tailored guidance towards the most suitable skin treatments. Her feature explores the intricacies of treating darker skin tones, highlighting the significance of customized protocols and "low and slow" techniques to guarantee safety and effectiveness in skin rejuvenation.
