### Unveil your inner strength!

You have been through so much and still you've done so much for everyone else. You have given everything you have yet more is required of you. On the brink is where heroes are made. It's time to shed that skin of deflation and unveil the power that lies within you. **-Dr. Sulyman-Scott**

# The Rhinoplasty Procedure

*Rhinoplasty Surgery isn't just a procedure—it's an art form.*

---

Rhinoplasty surgery also known as a Nose Job, encompasses a range of concerns, including:

- Nose size and width
- Bridge and tip shape
- Nostril size and shape
- Crooked or uneven nose
- Deviated septum causing breathing issues

Performed under general anesthesia, rhinoplasty can be conducted using either a closed or open approach, depending on the patient's needs. Dr. Sulyman-Scott skillfully sculpts the nose by reshaping bone, cartilage, and tissue to achieve the desired aesthetic and functional improvements.

# Rhinoplasty Journey

Rhinoplasty is a 1 year journey that extends beyond the operating room and while rhinoplasty may seem more affordable in other countries here are 3 important things to consider:

- Stringent safety standards and regulations in the US ensure a safer procedure.
- Accessible post-operative care and follow-up appointments provide convenience.
- Opting for surgery in the US offers significant advantages in managing complications and revisions, with accessible care readily available in case of any unforeseen issues.

Our team at That Face will be by your side throughout the entire process, guiding you through recovery, follow-up appointments, and beyond. Because when it comes to rhinoplasty, patience is key, and we're here to make every moment count.

# Results, Not Tools

While there may be discussions surrounding ***piezo rhinoplasty or ultrasonic techniques***, it's essential to emphasize that the focus remains on the results rather than the tools employed.

It's all about the surgeon! Dr. Sulyman-Scott is armed with skill, passion, and a commitment to excellence. Laser or scalpel, it doesn't matter—as long as the end result is a happy, confident you.

# Non-Surgical

## Rhinoplasty with Dermal Filler

Non-surgical rhinoplasty, also known as a liquid nose job, involves the use of injectable fillers to reshape and contour the nose without the need for surgery. This innovative technique can address common concerns such as dorsal humps, nasal asymmetry, and minor irregularities, providing subtle yet noticeable improvements in nasal aesthetics.

# Non-Surgical

## Rhinoplasty with PDO Threads

PDO (Polydioxanone) threads is also an option for non-surgical nose jobs. This procedure involves inserting absorbable threads into specific areas of the nose to reshape and contour it without the need for surgery. The threads stimulate collagen production, which helps to improve skin elasticity and firmness.
