# Achieve Facial Harmony and Confidence with Chin Augmentation

Chin augmentation is more than just a cosmetic enhancement—it's a pathway to achieving facial harmony and boosting your confidence. At That Face Facial Plastic Surgery, we understand that a well-defined chin can significantly impact the overall balance and aesthetics of your face. Whether you're looking to achieve a more pronounced jawline or correct a receding chin, Dr. Sulyman-Scott is here to help you attain the look you've always desired while ensuring natural-looking results that enhance your unique features.

# Chin Augmentation Surgery

Chin augmentation surgery is typically performed to augment an under-projected chin. This is usually accomplished by placing an implant directly on the bone. A small incision is made either inside the mouth or underneath the skin of the chin. After the implant is placed, the incision is then closed with sutures. Mild swelling may occur for a few days.

## **Benefits of Chin Augmentation:**

- Minimize the appearance of a “double chin”
- Improve facial profile
- Create a more defined jawline
- Make your chin and jawline more symmetrical
- Create a more refined and balanced face

# Chin Augmentation Surgery

Chin augmentation, enhances the projection, size, or shape of your chin. Increasing the projection of a weak or small chin can create an attractive balance to your facial features by enhancing the contours of the jawline and chin. Surprisingly, this procedure can make your nose look smaller while highlighting the beauty of your natural features.

# Non-Surgical Chin Augmentation

Non-surgical chin augmentation uses dermal fillers, such as hyaluronic acid, to add volume and shape. These fillers are injected strategically to enhance your chin's contours. Fillers are temporary and can be adjusted or dissolved if necessary

## Benefits of Chin Filler:

- Strengthen and define the chin
- Increase projection of the chin
- Improve facial symmetry
- Contour the jawline
- Minimize the appearance of a “double chin”
- Soften cleft chin

# Skin Care Spotlight

## Regenerating Skin Nectar with TriHex Technology

Helps strengthen skin ahead of cosmetic treatments, enhances treatment outcomes and reduces recovery time.

**Designed to complement:** Lasers, Chemical Peels, Microneedling and Facial Surgery.

—◆—  
**Product Feedback:** Must have for post treatment after microneedling or lasers, recovery goes much better and final result is much better as well.
