Message Be Youthful

Have you always felt younger than your actual age? Youthfulness is a state of mind based on your connection with your inner curious child, your desire to seek new experiences and your openness to still be marveled by the small things in life. Don't let your age determine how you feel or look. You have the power to be youthful at any age!-**Dr. Sulyman-Scott**

The Lip Lift: A Path to Fuller, More Defined Lips

At That Face, we understand that small changes can make a big impact. If you've been considering enhancing your smile, a lip lift could be the ideal option to create a more youthful, balanced appearance. Whether you're interested in surgical or non-surgical approaches, our team is here to guide you toward what's best for your unique face and goals.

Lip Lift Surgery

Long Lasting Transformation

For those seeking a more defined and permanent change, a surgical lip lift will offer lasting results. As we age the distance between the upper lip and the base of the nose lengthens which reduces the upper red lip show. A surgical lip lift is designed to shorten the space between the upper lip and the base of the nose, enhancing lip prominence and creating a more defined, fuller look.

Here's how it works:

The Procedure: A small incision is made just beneath the nose, where excess skin is removed, and the lip is lifted. Dr. Sulyman-Scott carefully positions the incision to minimize visible scarring.

Results: This procedure provides a permanent change, often resulting in a more defined cupid's bow and a naturally fuller appearance of the upper lip.

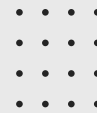

Recovery: Patients typically experience some swelling and bruising for about a week. Most are back to normal activities within 7-10 days.

Ideal For: Those seeking a long-term solution to create more lip definition, or individuals whose upper lip has lengthened with age.

Lip Transformation

Lip Lift Surgery

Lip Flip-Neurotoxin

For lip volume, consider a fat transfer procedure for a surgical option or lip fillers for a non-surgical approach.

2024

Non-Surgical Lip Enhancement

A non-surgical upper lip enhancement (**Lip Lift**), involves the use of neurotoxin(**Botox**)to subtly lift the upper lip, creating the appearance of a fuller, more defined shape without adding volume.

The Procedure: Neurotoxin is injected into specific muscles around the upper lip to relax them, causing the lip to gently flip outward. The treatment is quick and comfortable, typically taking 10–15 minutes.

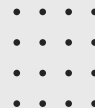

Results: Results from the lip flip are temporary, lasting around 2–3 months. The upper lip will appear more pronounced, enhancing your natural shape.

Recovery: Minimal downtime, with most patients resuming normal activities immediately. Any swelling is mild and resolves quickly.

Ideal For: Patients seeking a subtle enhancement, improved lip definition, or those exploring non-surgical options before considering fillers or other permanent procedures.

Skin Care Spotlight

INhance Post-Injection Serum with TriHex Technology®

Designed to complement injectable treatments like dermal fillers; formulated with ChromaFADE Technology™ to help improve the appearance of skin post-injection.

Product Feedback: OMG!!
The best serum to diminish bruises and heal an injection area quickly. It works for any bruising. Definitely, a winner!!!
