Scar Revision

Scars tell a story of the trauma your skin has experienced, but if you're looking to minimize or reshape yours, Dr. Sulyman-Scott offers a range of surgical and non-surgical options designed to make scars less noticeable.

Every scar is different, and the right treatment depends on its type and location, but rest assured we're here to guide you through the process of minimizing the appearance of your scar.

Types of Scars We Address:

- Hypertrophic Scars
- Keloid Scars
- Atrophic Scars
- Contracture Scars
- Surgical Scars
- Acne Scars
- Traumatic Scars
- Pigmented Scars

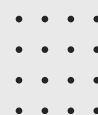

Combining Treatments for Best Results

Sometimes, a combination of surgical and non-surgical treatments may be necessary to achieve optimal results. Dr. Sulyman-Scott will personalize your scar revision plan based on the nature of your scar and your aesthetic goals.

Surgical Options

- **Excision-** For more prominent scars, Dr. Sulyman-Scott can surgically remove the scar tissue, closing the adjacent skin with sutures. This precise excision offers a fresh start for your skin.
- **Orientation Adjustment-** Sometimes, repositioning the scar can make all the difference. By realigning the scar into natural creases of the face, Dr. Sulyman-Scott ensures that the scar becomes less noticeable and blends seamlessly with the skin's natural folds.
- **Geometric Patterns for Long Scars-** For long scars, breaking them up using geometric patterns can significantly reduce their visual impact. This technique makes the scar appear more natural and less linear, helping it fade into your skin's contours.
- **Fat Transfer-** Scars that have caused depressions or unevenness in the skin may benefit from a fat transfer. This procedure restores the natural contour and harmony of the area, giving it a smoother appearance.

Non-Surgical Options

- **Steroid Injections**-For hypertrophic or keloid scars, steroid injections are an effective solution. By shrinking and softening the scar tissue, this treatment helps flatten raised scars.
- **Microneedling**-Ideal for acne scars, microneedling stimulates your body's natural healing process by creating tiny punctures in the skin. This rejuvenates the area and promotes smoother, firmer skin.
- **VIVACE**-Microneedling with Radiofrequency
For those seeking quicker results, VIVACE combines microneedling with radiofrequency energy to enhance collagen production and tighten the skin, making it an excellent option for acne scarring.

Non-Surgical Options

- **CO2 Laser**-Treatment Laser scar revision uses advanced CO2 technology to remove damaged skin layers and stimulate collagen production. This smooths the scar and improves the overall texture and brightness of the skin.
- **Chemical Peel**-Chemical peels improve the appearance of scars by exfoliating damaged skin, promoting new skin growth, and stimulating collagen production, which helps smooth and even out the skin. They are especially beneficial for treating mild scars and can also improve pigmentation

Skin Care Spotlight

Regenerating Skin Nectar with TriHex Technology®

- Helps strengthen skin ahead of cosmetic treatments to improve the appearance of smoother, brighter, more youthful-looking skin afterward.
- Calms post-procedure skin and helps reduce recovery time with Arnica, Phytoene, Phytofluene, and Narigenin with Panthenyl Triacetate.

◆

Product Feedback: This is one product that does what it says and you don't have to wait months for results. I use after microneedling & other laser treatments and it makes a huge difference in recovery time if you use this product.

Merz Emerging Global Leaders Program

We are excited to share that Dr. Sulyman-Scott has been nominated and accepted into Cohort 3 of the prestigious Emerging Global Leaders Program (EGLP) from Merz Aesthetics! Last month, she traveled to Germany to connect with leading providers from around the world. This 18-month program pairs emerging aesthetic leaders with renowned Key Opinion Leaders (KOLs), providing mentorship and insights that will directly benefit our patients. With this experience, you can feel confident knowing you're always in expert hands.
