## Message Be Grateful

Gratitude is a choice that can transform our view even when our lens remains the same. With gratitude comes the ability to see the beauty that surrounds us, the opportunity to find joy in the smallest moments and the liberation from chaos. I see the beauty in you and I am grateful that you are a part of our That Face Family. **Dr. Sulyman-Scott**

# Why Consider A Neck Lift?

Aging, genetics, and weight fluctuations can contribute to sagging skin, muscle banding, and excess fat around the neck, making it an area of concern for many. Whether you're looking for a dramatic change or subtle enhancement, modern options allow you to achieve a smoother, more contoured neck profile.

# Surgical Neck Lift Options: With and Without Skin Excision

A neck lift, remains the gold standard for those seeking more noticeable, long-term results.

## ***Neck Lift with Skin Excision***

- **How It Works:** A surgeon removes excess skin, tightening the area to create a smoother profile. Incisions are made discreetly, typically around the ears and/or under the chin.
- **Best For:** Individuals with significant skin laxity or excess sagging due to aging or weight loss.
- **Recovery:** Recovery may take 2-4 weeks, with most patients returning to activities in about two weeks. Full results develop over several months.

## ***Neck Lift Without Skin Excision***

- **How It Works:** This approach involves tightening the underlying muscles and sculpting deep fat without removing skin, making it less invasive.
- **Best For:** Those with minimal skin laxity but have muscle banding, enlarged submandibular glands or localized fat.
- **Recovery:** This option has a faster recovery, often around one week, with subtle, natural-looking results.

# Non-Surgical Option: Vivace RF Microneedling

## **What is Vivace RF Microneedling?**

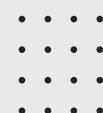

Vivace is an advanced microneedling device that uses RF energy to penetrate deep into the skin, encouraging natural collagen and elastin production. This non-surgical treatment addresses sagging skin, fine lines, and mild laxity, creating a firmer and more youthful neck profile.

## ***Benefits of Vivace for the Neck***

- **Minimal Downtime:** Vivace has minimal recovery time – many patients resume daily activities the next day.
- **Effective Tightening:** The RF energy heats deeper layers of the skin, tightening the tissue while improving skin texture.
- **Ideal for Mild Laxity:** Vivace is a fantastic solution for patients with mild sagging or those looking for preventative treatments before significant aging signs appear.

## ***Who Is It Best For?***

Vivace is perfect for those with early signs of neck aging who aren't ready for a surgical neck lift but want a refreshed, smoother look. It's also an excellent maintenance treatment for surgical patients who wish to keep results lasting as long as possible.

# Choosing The Right Option For You

## Comparing the Three Approaches

Feature	Neck Lift with Skin Excision	Neck Lift without Skin Excision	Vivace RF Microneedling
Best For	Moderate to severe skin laxity	Minor skin laxity, muscle banding	Mild skin laxity, early aging
Incisions	Small, behind ears or under chin	Small, under chin	Microneedling only
Recovery Time	2-4 weeks	1-2 weeks	Minimal, typically < 1 day
Expected Results	Dramatic, long-lasting	Subtle, effective for mild issues	Gradual improvement over sessions

Your choice depends on your skin condition, desired results, and comfort level with surgery. If you're ready for a dramatic transformation, a neck lift with or without skin excision offers lasting improvement. For those not yet ready for surgery or looking for preventative care, Vivace RF Microneedling provides an effective, non-surgical solution to keep your neck looking youthful.

# Skin Care Spotlight

## Alastin Essentials Bundle

- ***Gentle Cleanser (full size):*** A gentle gel cleanser specifically designed to remove impurities without drying or irritating the skin.
- ***Ultra Nourishing Moisturizer (full size):*** Helps to hydrate, nourish, and soothe skin.
- ***HydraTint Pro Mineral Broad-Spectrum Sunscreen SPF 36 (travel size):*** A lightweight, all-mineral, broad-spectrum tinted sunscreen that hydrates and protects skin from harmful UVA/ UVB rays while providing a soft, glowing appearance.

# PDO AfterGlo™

PDO AfterGlo™ combines Polydioxanone (PDO) in a finely milled powder form with Hyaluronic Acid (HA). Together, they create a luxurious blend that can transform your skin's texture and appearance.

***It combines two key ingredients:***

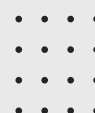

- Hyaluronic Acid (HA): Known for keeping skin hydrated, plump, giving that dewy look.
- PDO powder: mixed with sterile water and HA it helps improve skin texture and firmness.

*This blend is applied to your skin before microneedling or after laser treatments to enhance your results.*

**PDO AfterGlo™ targets:**

- Fine lines, like crow's feet
- Wrinkles, like smile lines
- Uneven skin texture

Truly  
Grateful  
for you

*Don't just take our word for it.  
Read what our patients have to say about  
That Face.*

**First of all having a few  
undesirable experiences with  
cosmetic procedures in the past I  
was very hesitant about ever  
trusting anyone again. Dr.  
Sulyman was very skilled and  
detailed . I can't say enough about  
my results .**
