# Sculpt Your Best Look: Facial Contouring for Men

---

More men are turning to facial contouring to enhance their natural features — and it's not about looking different, it's about looking your best. A strong jawline, balanced cheekbones, and a well-defined chin can sharpen your overall appearance and give you a more confident look.

At That Face in Chicago, Dr. Sulyman-Scott specializes in helping men achieve subtle, natural-looking definition with tailored treatments — from non-surgical options like fillers and Botox to more permanent solutions like buccal fat removal and chin implants.

Let's explore the most effective ways to define your facial structure.

# Sculpt Your Best Look: Facial Contouring for Men

---

## Dermal Fillers for Facial Contouring

- Jawline Enhancement – Adds definition to the jawline for a stronger, more chiseled look.
  - Chin Augmentation – Enhances the projection and width of the chin for a more square, masculine shape.
  - Cheek Enhancement – Strengthens the appearance of high, defined cheekbones, which can create a more structured face.
- 

**This patient wanted to restore lost volume in his cheeks and achieve a more refreshed look. We treated him with dermal fillers to enhance his cheek volume and neurotoxin to smooth wrinkles in his upper face—leaving him looking rejuvenated and rested.**

---

## Neurotoxin (Botox, Dysport, Xeomin)

- Neurotoxin to achieve a more refreshed look by smoothing wrinkles and fine lines in the upper face
- Neck & Platysma Botox – Reduces the appearance of sagging in the lower face and defines the jawline.

**This patient wanted to smooth the wrinkles on his forehead. We treated the area with neurotoxin, leaving him with a smoother, more refreshed look—no more lines!**

# Considering Surgery?

## Sculpt Your Look With These Popular Surgical Procedures

---

At That Face, we offer a range of facial contouring procedures that can transform your profile with natural-looking, long-lasting results. Here are the most requested surgical treatments for men who want to enhance their facial structure:

**Fat Transfer,** fat is harvested from areas like the abdomen or thighs and injected into areas of the face that need volume. It's an excellent option for adding fullness to the cheeks, chin, jawline or under the eyes, creating a more sculpted and youthful appearance.

**Buccal Fat Removal,** if you have a fuller face or lack definition in your cheekbones, buccal fat removal can help enhance your facial profile. The procedure involves the removal of excess fat from the lower cheeks, revealing more prominent cheekbones and a more chiseled look this procedure can significantly sharpen your face.

---

**Chin Implant**, a chin implant is a simple but effective way to balance and define your profile. Whether you want to add projection or strengthen the overall shape of your chin, this procedure provides a permanent solution for a sharper, more masculine appearance.

**Neck Liposuction**, for men who want to define their jawline and eliminate excess fat around the neck, neck liposuction is an ideal option. It targets stubborn fat under the chin and along the neck, offering a more defined, sculpted jawline.

**Note:** *Each of these procedures can be done in-clinic and are tailored to meet your unique needs.*

# Why Cleanse?

Throughout the day, your skin collects dirt, oil, and environmental pollutants that can dull your complexion and clog your pores. Cleansing morning and night not only removes these impurities but also preps your skin to better absorb your corrective serums and treatments. A clean canvas means better results — and healthier, more radiant skin.

---

## Ultra Brightening Foaming Cleanser

*This silky foam gently lifts away dirt, oil, and makeup, leaving your skin feeling refreshed and looking brighter.*
