Beauty in progress!

The vision is crystal clear but yet the path seems dimly lit and unpaved. Progress seems slow as you desperately hold onto your wavering faith. Just like the magnolia tree's roots grow silently before you see its flowers, your beauty is in progress and in due time you shall blossom.-**Dr. Sulyman-Scott**

Noticing Wrinkles? Here's What You Can Do About Them

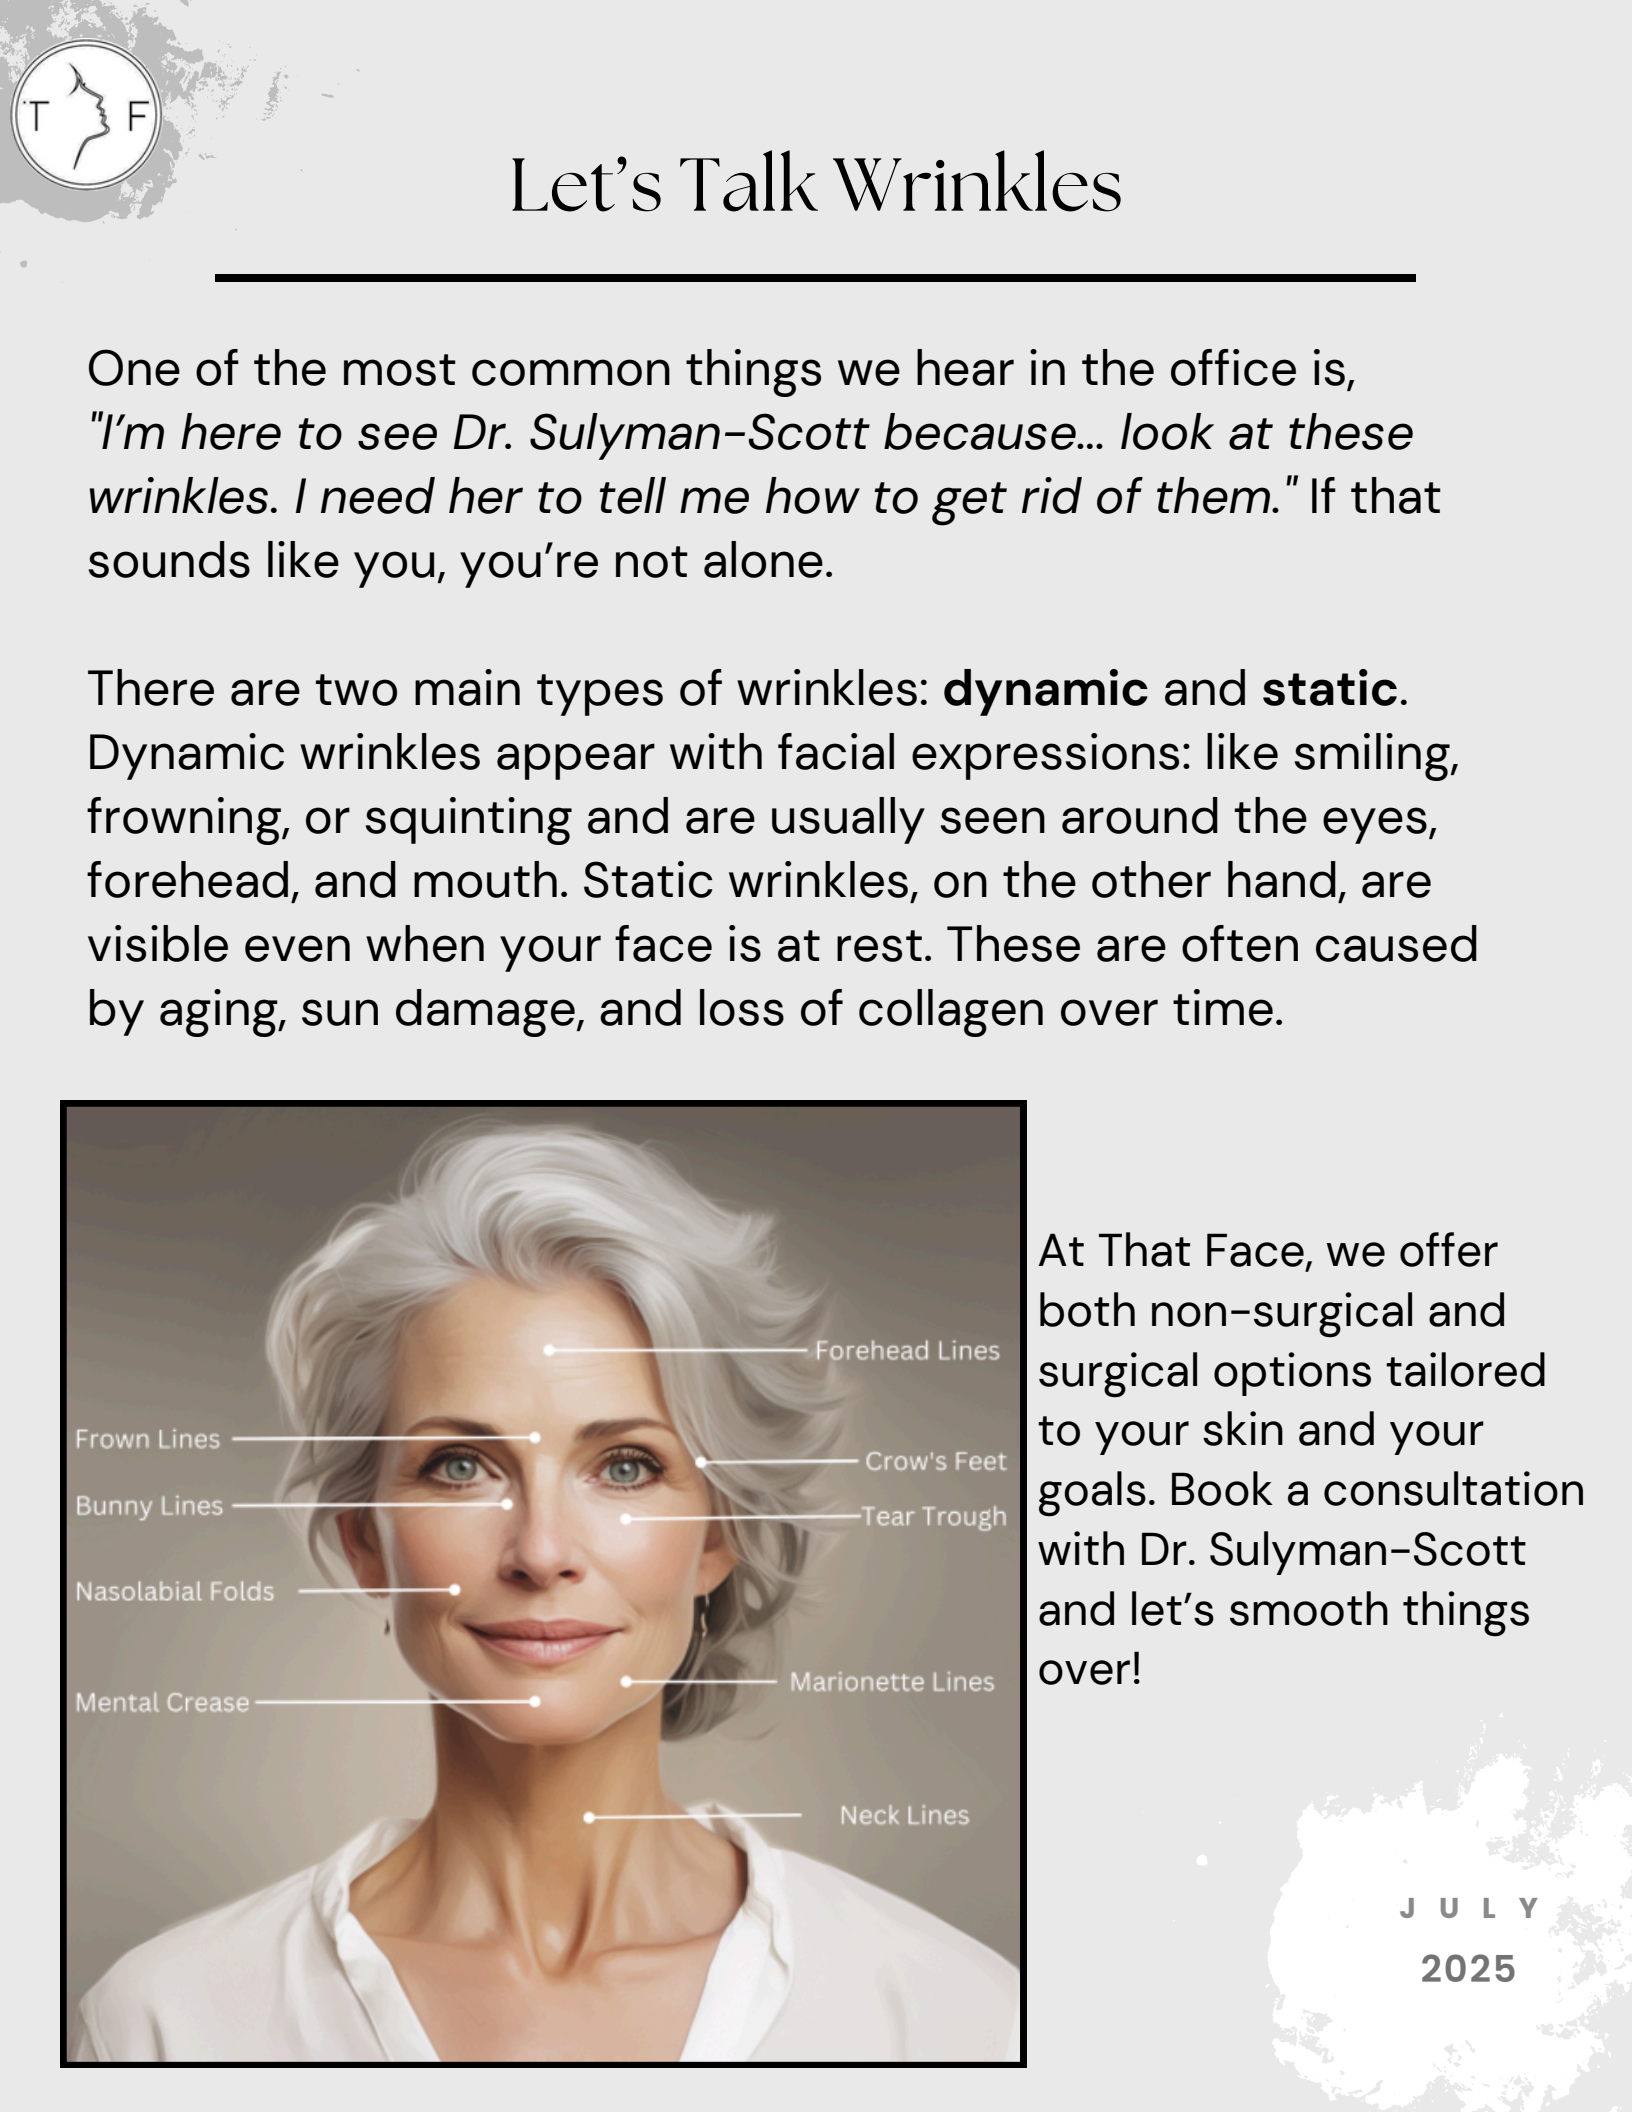

Ultraceuticals: Ultra A Perfecting Serum Mild

New to retinol? Start here.
Targets wrinkles without
the irritation.

Let's Talk Wrinkles

One of the most common things we hear in the office is, *"I'm here to see Dr. Sulyman-Scott because... look at these wrinkles. I need her to tell me how to get rid of them."* If that sounds like you, you're not alone.

There are two main types of wrinkles: **dynamic** and **static**. Dynamic wrinkles appear with facial expressions: like smiling, frowning, or squinting and are usually seen around the eyes, forehead, and mouth. Static wrinkles, on the other hand, are visible even when your face is at rest. These are often caused by aging, sun damage, and loss of collagen over time.

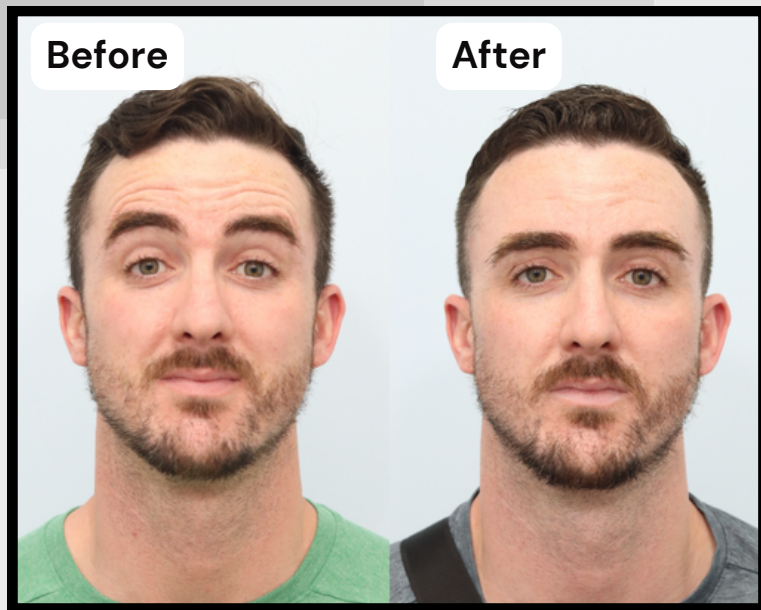

At That Face, we offer both non-surgical and surgical options tailored to your skin and your goals. Book a consultation with Dr. Sulyman-Scott and let's smooth things over!

Wrinkle Treatments

Neurotoxin(Botox, Dysport & Xeomin) Relax overactive muscles that cause dynamic wrinkles, think forehead lines, frown lines (11s), crow's feet. Quick, effective, and preventative.

Results of neurotoxin should appear natural. You should always look like a rejuvenated version of yourself.

Dermal Fillers: Perfect for softening deeper lines (like smile lines and marionette lines) and restoring lost volume in areas like the cheeks, temples, and under-eyes.

CO2 Laser: A deeper resurfacing treatment that precisely targets fine lines, texture, and sun damage. It's especially powerful for deeper wrinkles and overall skin rejuvenation.

Microneedling (Vivace RF):

This treatment stimulates collagen with a combo of microneedling + radiofrequency. It tightens skin, smooths wrinkles, improves texture, and gives a radiant glow with minimal downtime.

Patient had Vivace treatment for static wrinkles. Results shows a noticeable reduction in forehead and eye lines, with smoother, more refreshed-looking skin.

Chemical Peels: These exfoliate the top layers of skin to reveal smoother, brighter skin underneath. Great for fine lines, uneven tone, and that dull, tired look.

Skincare Ingredients That Actually Work For Wrinkles

Using the right ingredients daily can make a big difference in preventing and treating wrinkles. Focus on products that support collagen, protect your skin, and improve hydration.

Don't Skip the Sunscreen!

SPF is your most powerful anti-aging tool. Without daily sun protection, even the best ingredients and treatments can only do so much.

Retinol or Retinoids

Collagen-boosting powerhouses that smooth fine lines and improve skin texture. Start slow if you're new to them.

Hyaluronic Acid

Deeply hydrates and plumps the skin, making wrinkles less noticeable. Great in serums and moisturizers.

Vitamin C

An antioxidant that brightens the skin, protects against damage, and helps stimulate collagen. Ideal for daytime use.

Peptides

These support skin firmness, elasticity, and repair, perfect for strengthening aging skin.

Is Surgery An Option For Wrinkles?

If you're looking for a longer-lasting solution or feel like non-surgical treatments aren't giving you the results you want, surgery might be the right next step.

Facelift or Mini Facelift: Lifts and tightens sagging skin, softens deep folds, and restores youthful contours in the lower face and jawline. Results can last years.

Eyelid Surgery (Blepharoplasty): Removes excess skin and smooths out wrinkles around the eyes—great for droopy lids or under-eye puffiness.

Fat Transfer: Uses your body's own fat to restore volume and smooth deep lines, especially around the cheeks, temples, and mouth.

Neck Lift: Targets neck bands, sagging skin, and deeper wrinkles below the jawline.

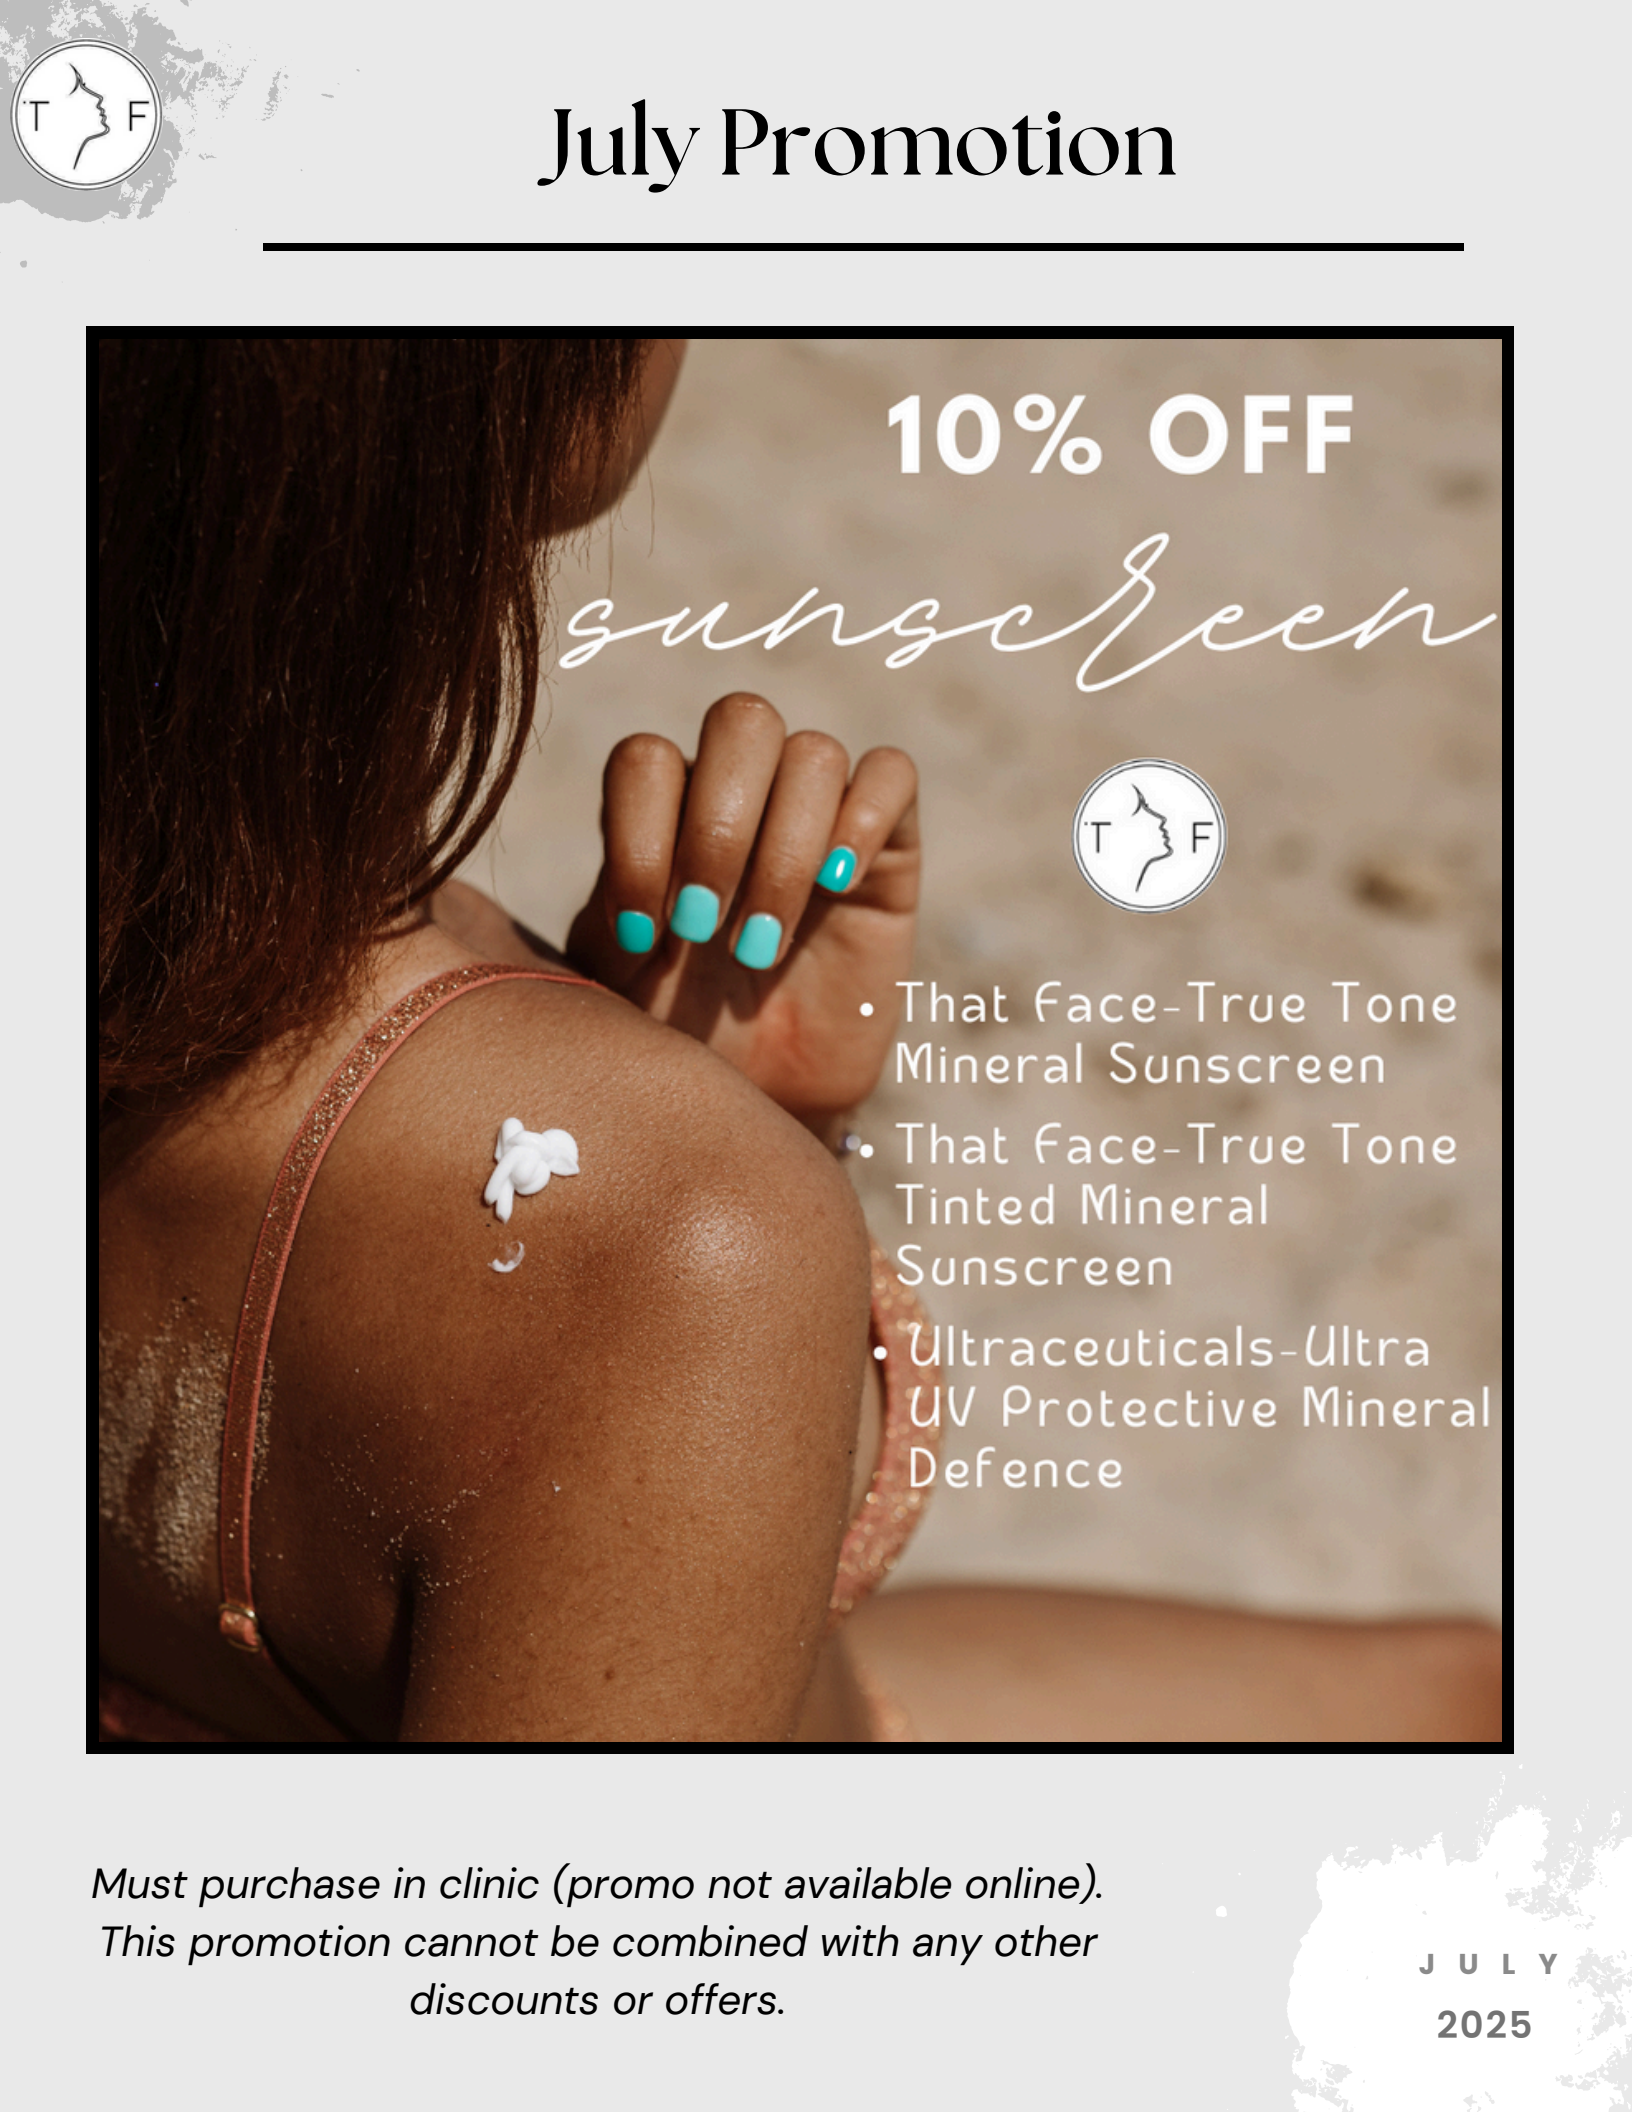

Ultraceuticals: Ultra A Perfecting Serum Mild

Great for first-time retinol users or sensitive skin. Use at night, and don't forget sunscreen during the day!

- ✓ Smooth fine lines
- ✓ Boost collagen
- ✓ Improve skin texture

We're proud to be the best decision for so many of our patients. Here's what they have to say about their experience with us.

LOVE the doctor, LOVE the staff, LOVE the service, and LOVE the vibe and energy!!

Even my mom was so pleased with my results that she is going in for the same procedure!

At That Face, our patients are the heart of everything we do.
