Trick or Treat

Exploring Lip Reduction Surgery

Lip reduction surgery has become a staple procedure for Dr. Sulyman-Scott, bringing patients from across the country seeking her expertise. While many plastic surgeons don't perform this surgery, Dr. Sulyman-Scott performs it safely, precisely, and comfortably in-clinic.

Why This Is Not A Commonly Offered Procedure

Over the past few years, most patients have focused on lip augmentation. However, more patients are now noticing lips that appear too large or out of proportion with their facial features. Unlike fillers or lip lifts, lip reduction surgery aims to reduce the volume of the red lip or improve red lip symmetry.

Exploring Lip Reduction Surgery

Lip reduction is a precise procedure which requires a keen understanding of lip anatomy and a refined sense of facial balancing.

Refined balance after reduction surgery.

Lip enlargement from prior silicone injections.

Lip reduction is a niche procedure that many plastic surgeons are unaware of or are not properly trained to perform it. Which is why it is important to seek the care from an expert like Dr. Sulyman-Scott.
