Don't Forget Your Neck

In consultations, we notice patients tend to focus on the face while forgetting the neck. As Dr. Sulyman-Scott always says, "Think of the face and neck as a unit. What you do to the face, you should also do to the neck." When you care for one, you should care for both.

When it comes to facial rejuvenation, the neck often tells the story before the face does. Loose skin, visible bands, and that stubborn pocket of fat under the chin can add years to your appearance, even when you feel young and confident inside.

Dr. Sulyman-Scott, our double board-certified Facial Plastic & Reconstructive Surgeon, specializes in restoring definition and harmony through neck lift surgery.

What a Neck Lift Can Do for You

Each procedure is tailored to your anatomy and goals. Dr. Sulyman-Scott often combines muscle tightening, fat contouring, and careful skin redraping to create elegant, lasting results that still look like you.

A neck lift is designed to :

**Define and sharpen the
jawline**

Smooth sagging or crepey skin

Eliminate “turkey wattle” or banding

**Recreate a youthful, graceful
neckline**

***3 months
after neck lift***

***results will continue to improve over
the next several months as the
residual swelling resolves***

Combine for Complete Rejuvenation

The neck is a layered structure, so treatment in multiple layers gives the best result. That's why many of our patients choose a comprehensive treatment plan that may include:

- ◆ **Facelift:** to lift sagging jowls and cheeks for a seamless transition between face and neck

Lower Facelift with Neck Lift

- ◆ **Neck Liposuction:** to refine stubborn fullness under the chin and sharpen the jawline

Neck Lipo with RF

- ◆ **Non-surgical refinements like:** laser resurfacing, RF microneedling, or injectables to improve tone and texture.
