Rhinoplasty: More Than Appearance

Why expertise matters more than you think

Rhinoplasty affects both how your nose looks and how it functions over time. Even subtle cosmetic changes can influence how your nose works long after surgery. That's why who you choose matters.

At That Face, rhinoplasty is approached as both a cosmetic and functional procedure. A beautiful nose should never compromise your breathing.

Schedule Your Consultation

Dr. Sulyman-Scott is patient-focused and highly accomplished double-board-certified Facial Plastic & ENT Surgeon with a fresh approach to plastic surgery.

Cosmetic vs. Functional Rhinoplasty

What's the difference?

A **cosmetic rhinoplasty** focuses on reshaping the nose for appearance. Without proper technique and consideration, the structural integrity and long-term stability of the nose can be affected.

A **functional rhinoplasty** focuses on optimizing breathing by strategically making changes to the internal nasal structure. This may not translate to aesthetic changes of the nose.

Ethnic rhinoplasty is designed for patients seeking refinement while preserving the natural features, structure, and identity unique to their ethnic background.

If I breathe fine, why does ENT training matter?

Rhinoplasty directly affects breathing pathways, cartilage support, and long-term nasal function.

The nose is uniquely complex and delicate. Even millimeter changes in certain structures of the nose can significantly impact nasal airflow.

What may appear to be small changes (refining the tip, smoothing a hump, narrowing the bridge) can weaken nasal support if not performed carefully and precisely.

At That Face, rhinoplasty is guided by both appearance and function, so results look natural and last over time.

Why Long-Term Results Matter

*Some rhinoplasties look great at 6–12 months...
then slowly change.*

Without proper support, patients may notice:

- ▶ pinching of the tip
- ▶ gradual drooping
- ▶ nasal collapse
- ▶ asymmetry as swelling resolves
- ▶ internal weakening over time

*Long-term stability depends on how well the nose
is supported beneath the surface.*

Subtle Changes Take More Skill

Patients asking for “just a small change” are often the most complex cases.

Millimeters matter. There’s less room for error, and overcorrection is obvious.

Open rhinoplasty (tip work only) and alarplasty

Patient's goal: To contour her tip and narrow the alar width. She was happy with other aspects of her nose and did not want drastic changes.

Natural results are planned from the inside out, respecting anatomy while refining shape.

When Details Matter: Alar Refinement at 5 Months

This patient had a previous alarplasty by a different surgeon, and the prior incision was used for her revision.

In addition to the reduction of her alar width and flaring, she has an improvement in the position of her nasal tip.

Patient's goal: Reduced alar width and flaring.

Hydrinity Hyacyn Active Purifying Mist

Fresh Skin, Anytime

Helps reduce bad bacteria

Formulated to match your skin's natural pH

Enhances absorption of your skincare products

Speeds up healing after treatments

Safe for all skin types, even sensitive and post-procedure skin

Helps reduce breakouts, redness and irritation

♥ **Pro tip: Keep it in your bag for an instant skin refresh.**

Receive 10% off on your 3rd product purchase (*in-clinic only*)

2026

We're proud to be the best decision for so many of our patients. Here's what they have to say about their experience with us.

My results were exactly what I was looking for.

I am extremely pleased with the results of my reconstructive rhinoplasty.

At That Face, our patients are the heart of everything we do.
