

Grace

True grace rarely comes from excess. It comes from knowing exactly how much is enough, and having the confidence to make it look beautiful.

Filler:

Myth vs. Fact

Let's clear up some of the biggest misconceptions about dermal filler.

MYTH: Filler migrates around your face.

FACT: What is often described as “filler migration” may actually be related to product placement, excess volume, swelling, or repeated unnecessary treatments over time.

An overfilled appearance doesn't necessarily mean your filler has moved

BUT WHAT ABOUT...?

PILLOW FACE | OLD FILLER | DISSOLVING

3 common filler questions answered

AUGUST

2026

Does Filler Really Migrate?

When dermal filler is appropriately selected and precisely placed, it is injected into a specific anatomical area and tissue plane.

What someone may describe as “**migration**” can actually be related to swelling, product placement, the amount of filler used, changes in surrounding tissue, or repeated unnecessary treatments over time.

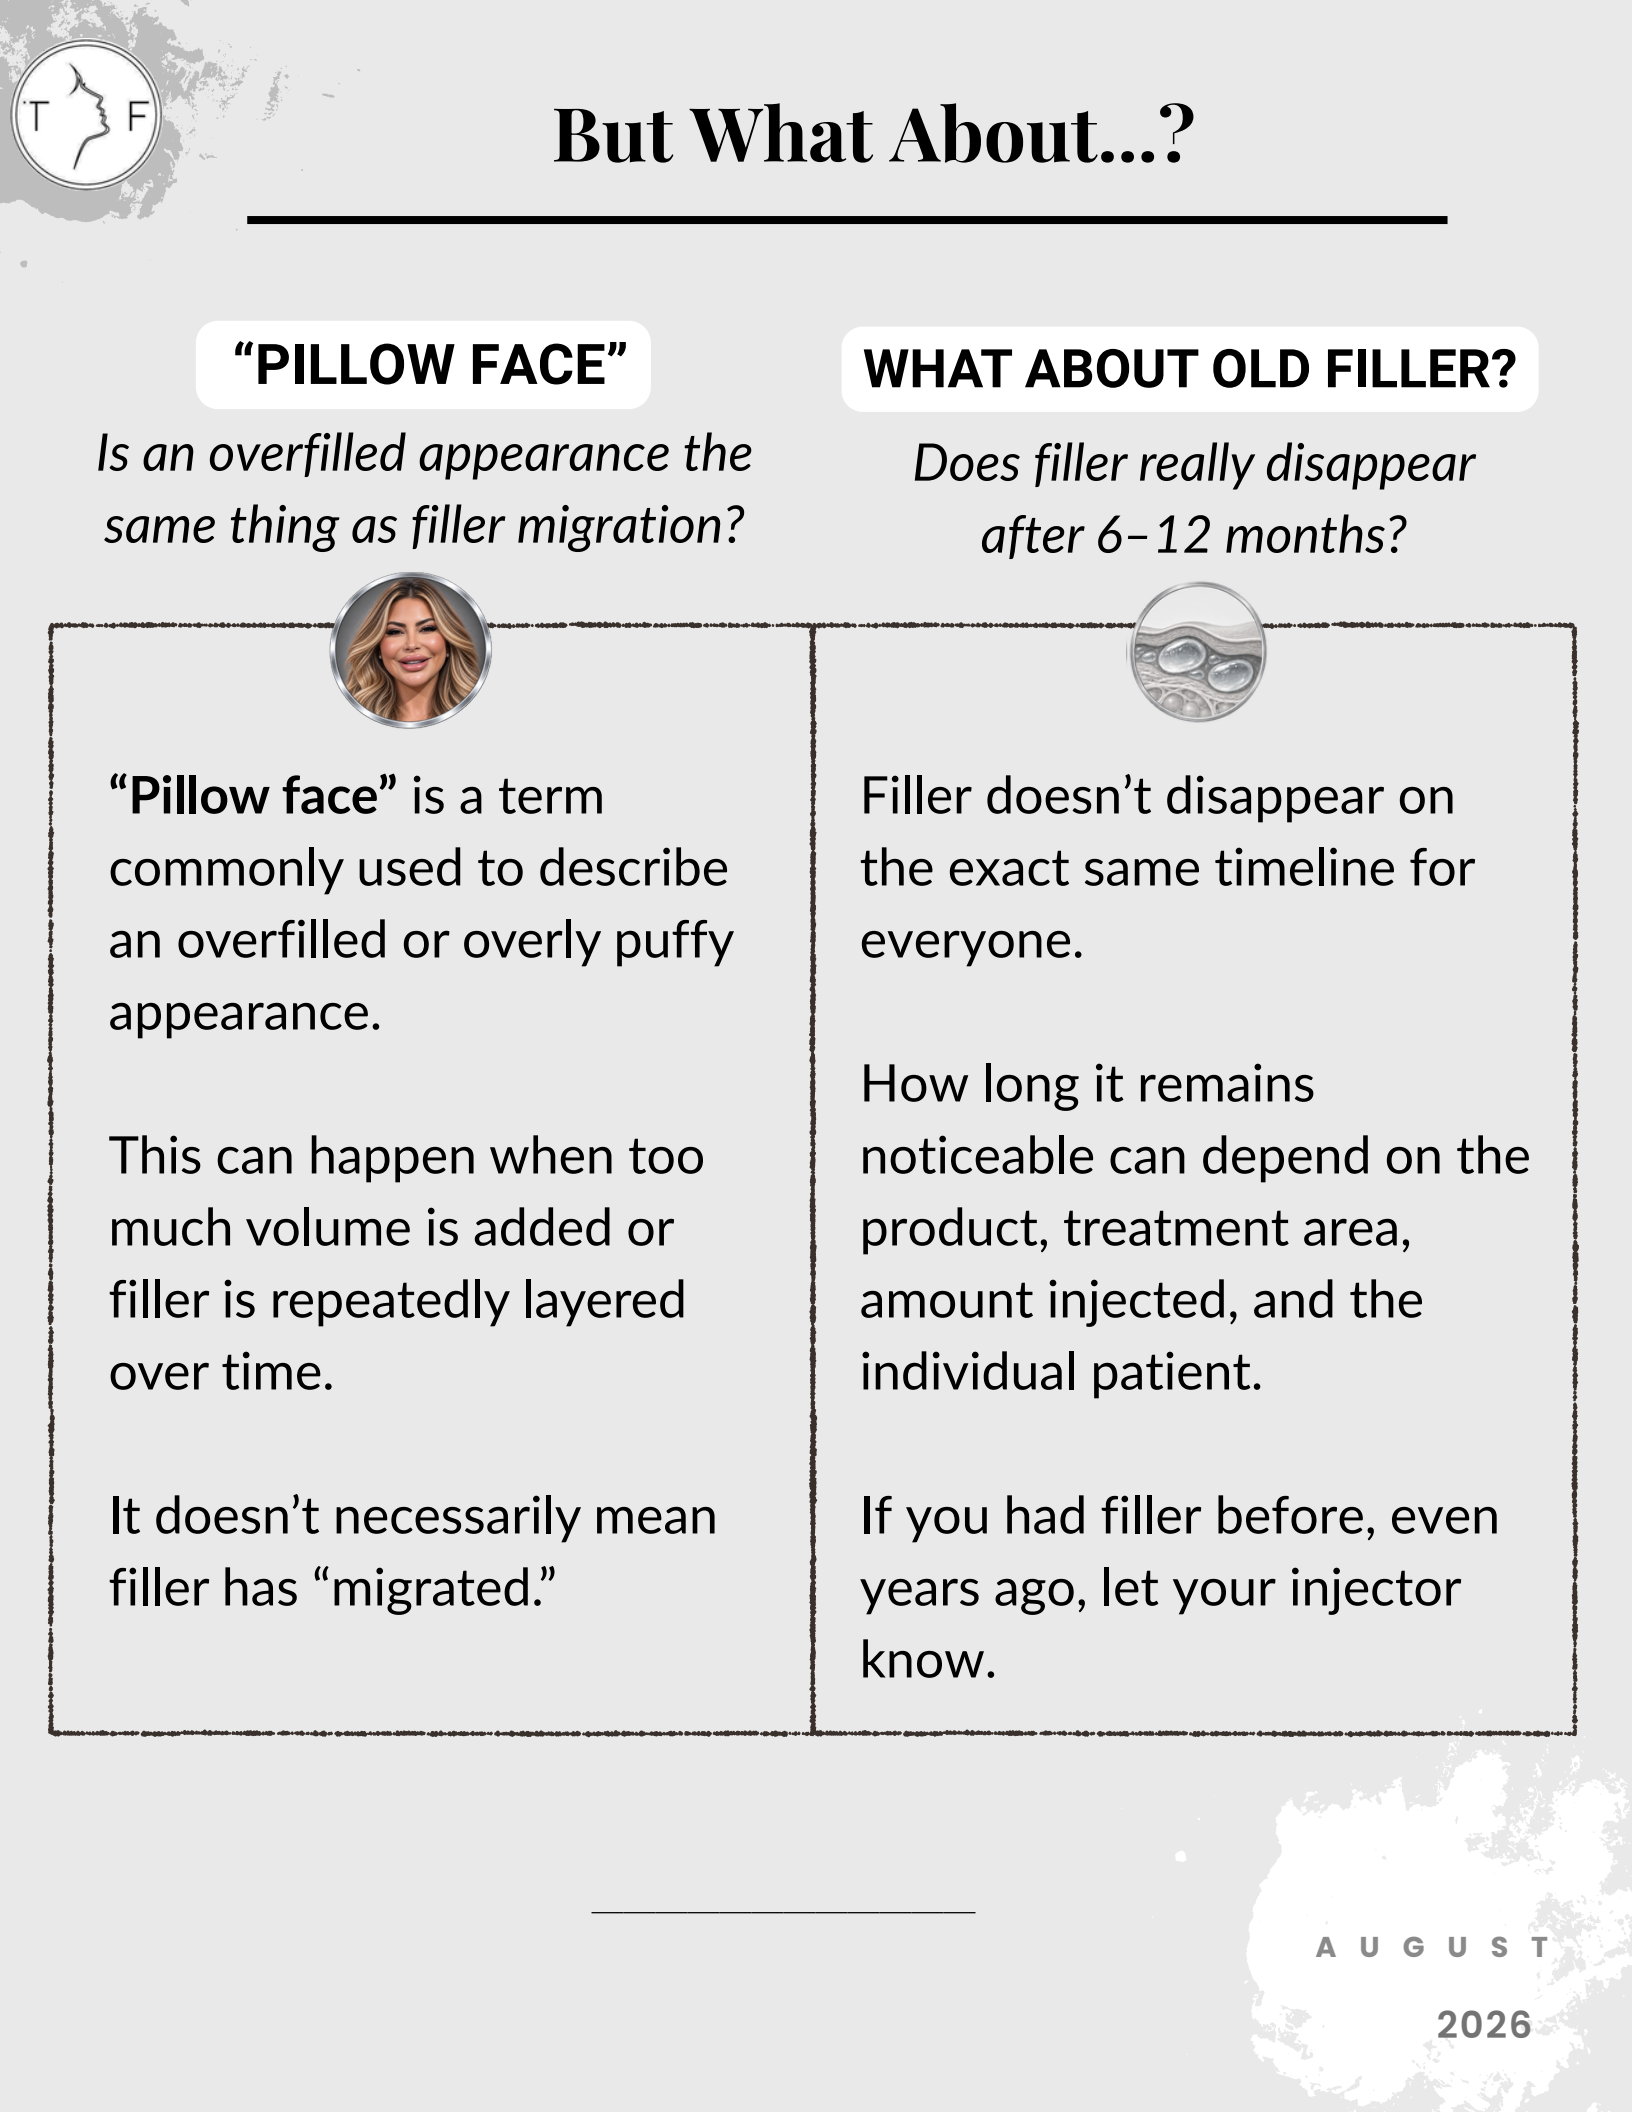

**MORE FILLER
ISN'T ALWAYS
BETTER.**

The goal is balance not simply adding volume.

THE BOTTOM LINE:

Technique, anatomy, product selection, and knowing how much filler to use all matter.

But What About...?

"PILLOW FACE"

Is an overfilled appearance the same thing as filler migration?

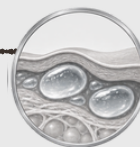

"Pillow face" is a term commonly used to describe an overfilled or overly puffy appearance.

This can happen when too much volume is added or filler is repeatedly layered over time.

It doesn't necessarily mean filler has "migrated."

WHAT ABOUT OLD FILLER?

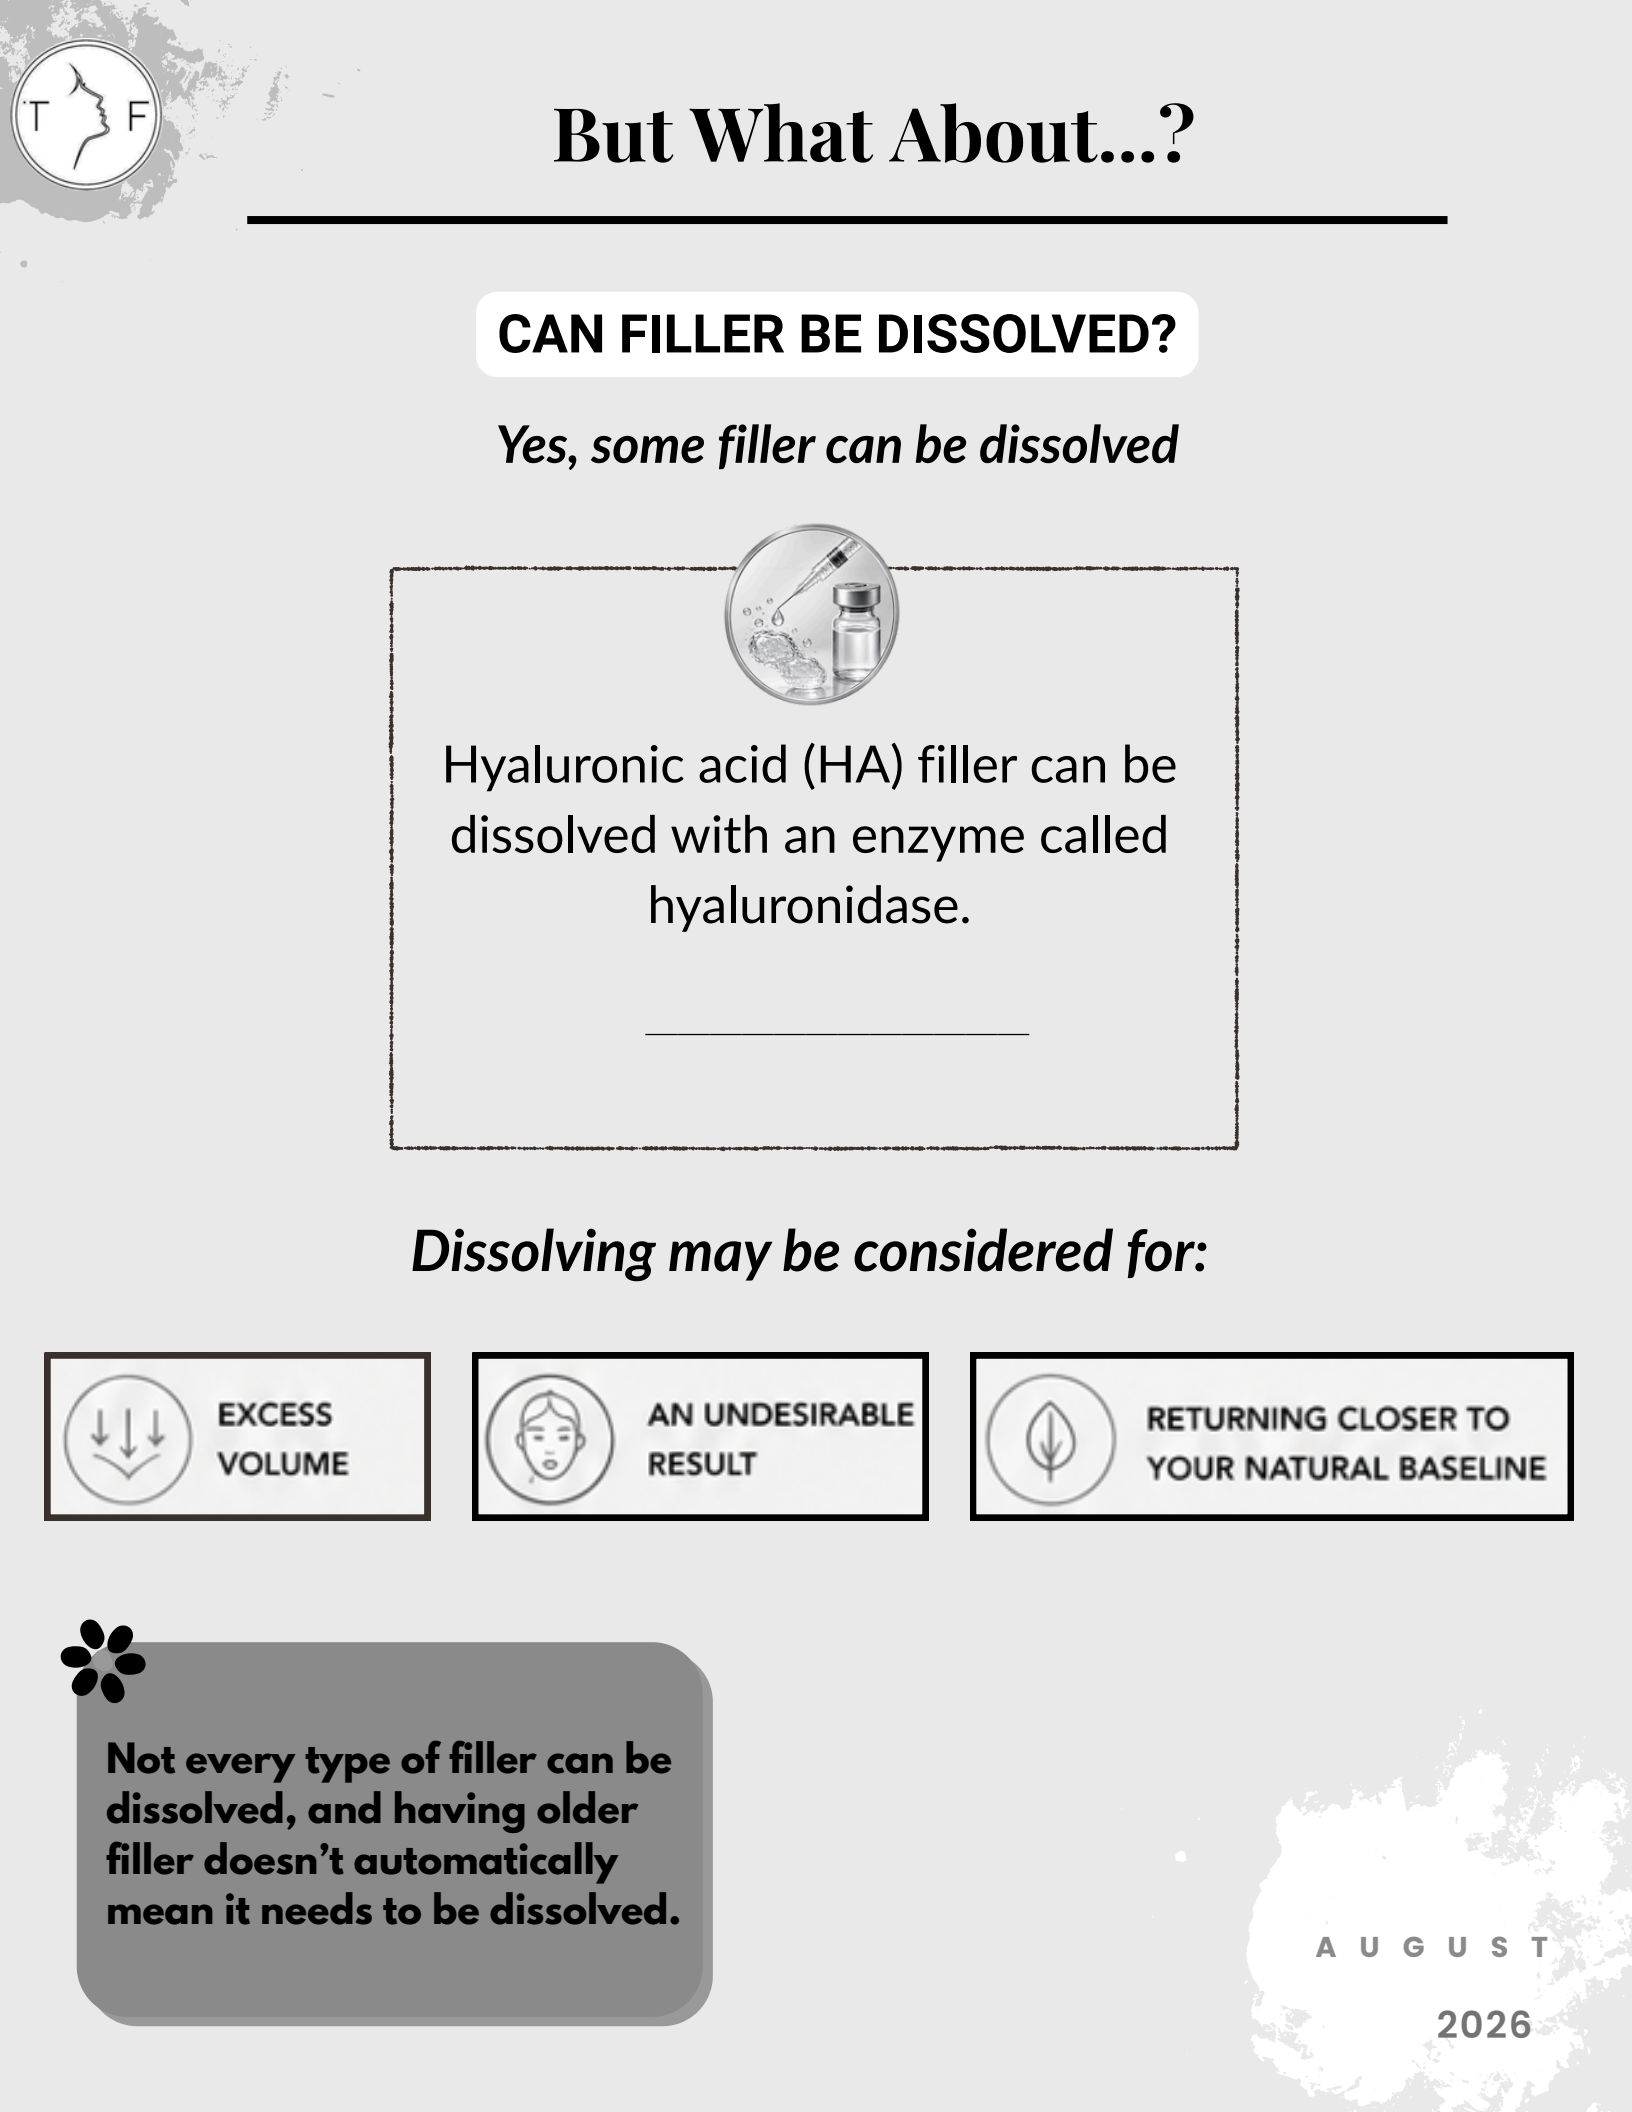

Does filler really disappear after 6-12 months?

Filler doesn't disappear on the exact same timeline for everyone.

How long it remains noticeable can depend on the product, treatment area, amount injected, and the individual patient.

If you had filler before, even years ago, let your injector know.

But What About...?

CAN FILLER BE DISSOLVED?

Yes, some filler can be dissolved

Hyaluronic acid (HA) filler can be dissolved with an enzyme called hyaluronidase.

Dissolving may be considered for:

EXCESS
VOLUME

AN UNDESIRABLE
RESULT

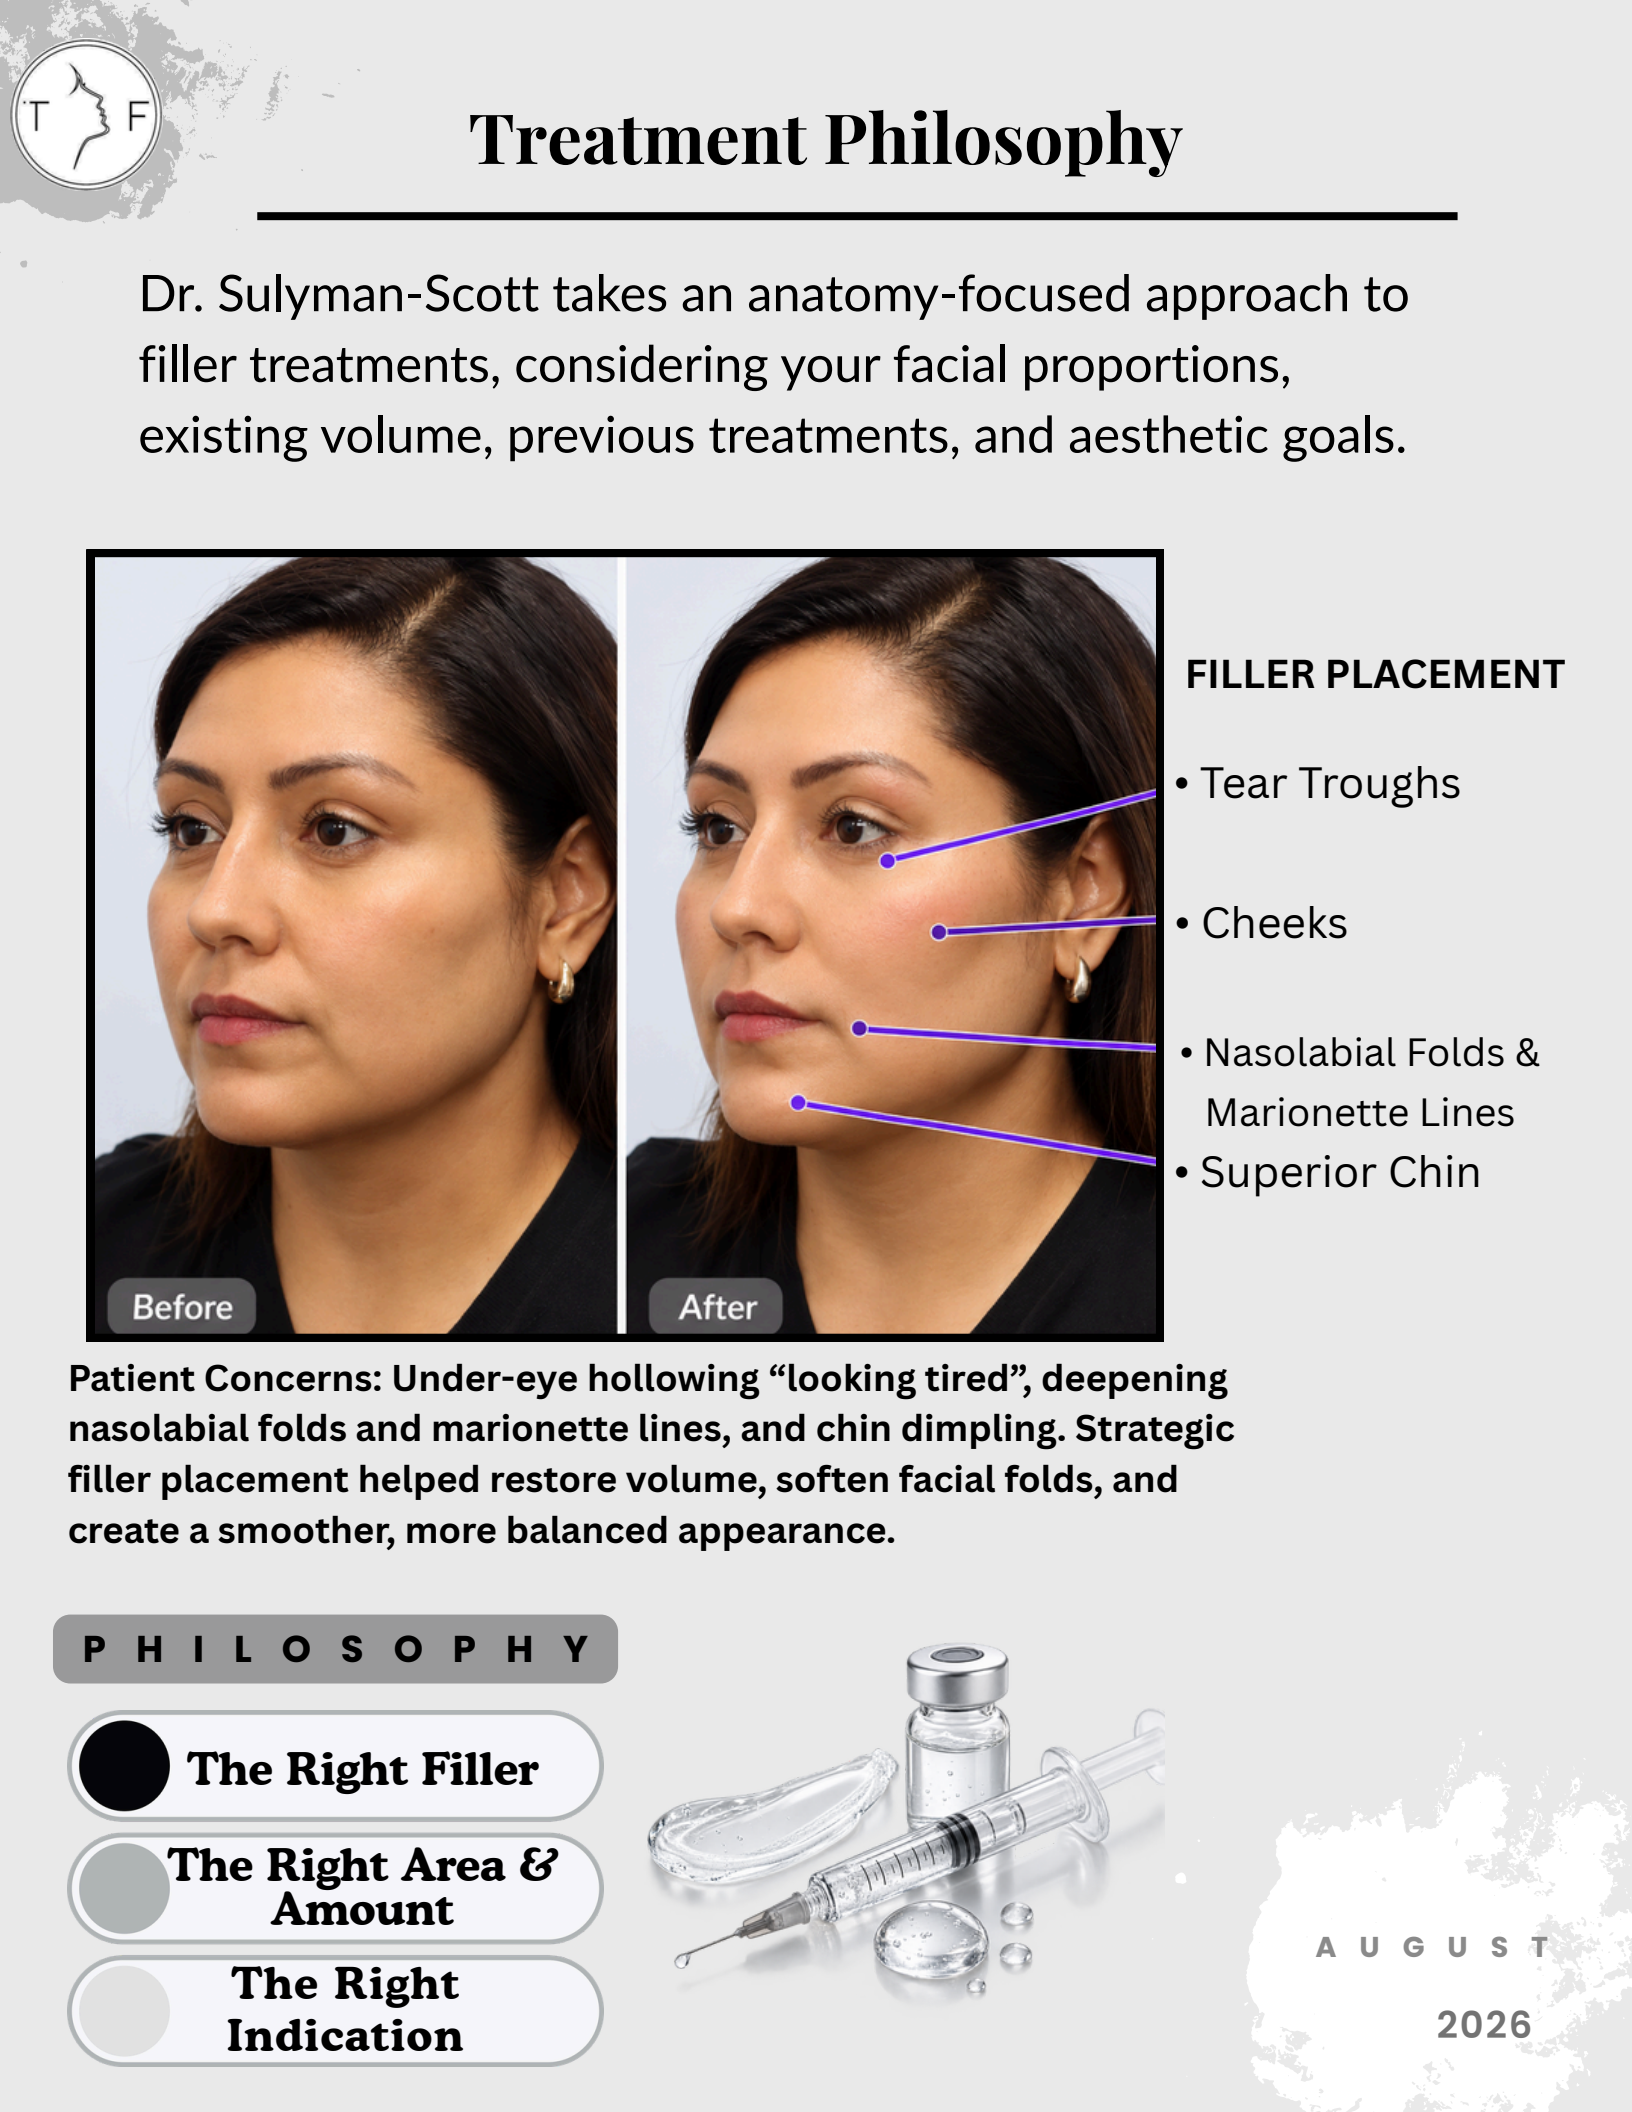

RETURNING CLOSER TO
YOUR NATURAL BASELINE

Not every type of filler can be dissolved, and having older filler doesn't automatically mean it needs to be dissolved.

Treatment Philosophy

Dr. Sulyman-Scott takes an anatomy-focused approach to filler treatments, considering your facial proportions, existing volume, previous treatments, and aesthetic goals.

FILLER PLACEMENT

- Tear Troughs
- Cheeks
- Nasolabial Folds & Marionette Lines
- Superior Chin

Patient Concerns: Under-eye hollowing “looking tired”, deepening nasolabial folds and marionette lines, and chin dimpling. Strategic filler placement helped restore volume, soften facial folds, and create a smoother, more balanced appearance.

PHILOSOPHY

-  **The Right Filler**
-  **The Right Area & Amount**
-  **The Right Indication**

The Takeaway

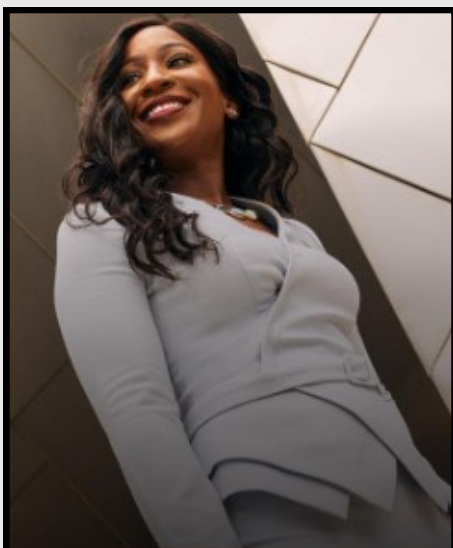

Terms like “**filler migration**” and “**pillow face**” can make filler sound scary, but they don’t tell the whole story.

Thoughtful treatment isn’t about chasing volume. It’s about understanding the face, respecting its natural proportions, and knowing when to add, and when not to add filler.

Natural results start with thoughtful treatment

- ✦ Not every patient needs filler.
- ✦ Not every area needs filler.
- ✦ And sometimes, the best treatment decision is not adding more.

Schedule Your Consultation

Dr. Sulyman-Scott is patient-focused and highly accomplished double-board-certified Facial Plastic & ENT Surgeon with a fresh approach to plastic surgery.

At That Face Facial Plastic Surgery, we believe everyone deserves to feel beautiful, without financial stress. That's why we offer flexible financing.

We're proud to be the best decision for so many of our patients. Here's what they have to say about their experience with us.

One final thing that stood out to me was Dr. Sulyman-Scott's overall philosophy. Looking through her work, and after meeting her in person, I got the impression that she's interested in refining people's natural features rather than changing who they are.

The improvement is noticeable, but still looks like me, just more refreshed and rejuvenated.

At That Face, our patients are the heart of everything we do.
