A Balanced Profile Starts with the Chin

The chin is one of the most influential features when it comes to facial harmony. Whether through **chin filler** or a **chin implant**, enhancing chin projection can improve the appearance of the jawline, soften the prominence of the nose, and create a more balanced side profile.

Chin Filler or Chin Implant: Which Is Right for You?

Not every patient has the same goals, which is why Dr. Sulyman-Scott offers both non-surgical and surgical options for chin enhancement. During your consultation, Dr. Sulyman-Scott will help determine which option is best suited to your anatomy and goals.

Dr. Sulyman-Scott is patient-focused and highly accomplished double-board-certified Facial Plastic & ENT Surgeon with a fresh approach to plastic surgery.

Chin Filler vs. Chin Implant

	 CHIN FILLER	 CHIN IMPLANT
 Procedure	Non-surgical injectable treatment	Surgical procedure
 Best For	Subtle enhancement and improved facial balance	More significant or permanent chin enhancement
 Results	Immediate	Final results develop as swelling resolves
 Longevity	Approximately 9–18 months	Permanent
 Downtime	Little to no downtime	Recovery period required
 Reversible?	Yes, hyaluronic acid filler can be dissolved if needed	It can be revised or removed through surgery if necessary
 Ideal Candidate	Patients who prefer a temporary enhancement before considering a permanent solution	Patients seeking a long-term solution for a recessed or under-projected chin
