

OXYGEN FACIAL

Dream Spa Medical is pleased to offer Hollywood's hottest treatment: the Intraceuticals Oxygen Facial. This non-invasive therapy targets fine lines and wrinkles, leaving you with a hydrated and lifted appearance.

The treatment combines Vitamins A & E, Hyaluronic acid, Peptides and antioxidants to achieve instant and dramatic results. The 3-step process uses oxygen under pressure to deliver these ingredients deep into the skin, allowing us to build a hydrated, balanced, and glowing surface from the bottom up.

This method creates a perfect canvas for that special occasion, and increases product permeability and results as a monthly maintenance play. The treatment can be customized, or coupled with laser therapy, to address additional cosmetic concerns. In any application, you'll leave looking camera ready and feeling fine.

PRE-TREATMENT

- Avoid active ingredients such as acids, astringents, retinal and topical prescription 3 days prior to your appointment.
- Avoid chemical treatment 5-7 days prior to your appointment.

POST-TREATMENT

- Avoid active ingredients such as acids, astringents, retinal and topical prescription for 3 days.
- Avoid chemical treatments for 5-7 days after your appointment.
- Use a minimum SPF sunscreen.
