11 new next-generation Mega-ships between 2017-2026

MSC Cruises, part of the MSC Group, is the Swiss-based, world's largest privately-owned cruise line and brand market leader in Europe, South America and South Africa, sailing year-round in the Mediterranean and the Caribbean. Seasonal itineraries cover northern Europe, the Atlantic Ocean, Cuba and the French Antilles, South America, southern Africa, China and Abu Dhabi, Dubai and Sir Bani Yas.

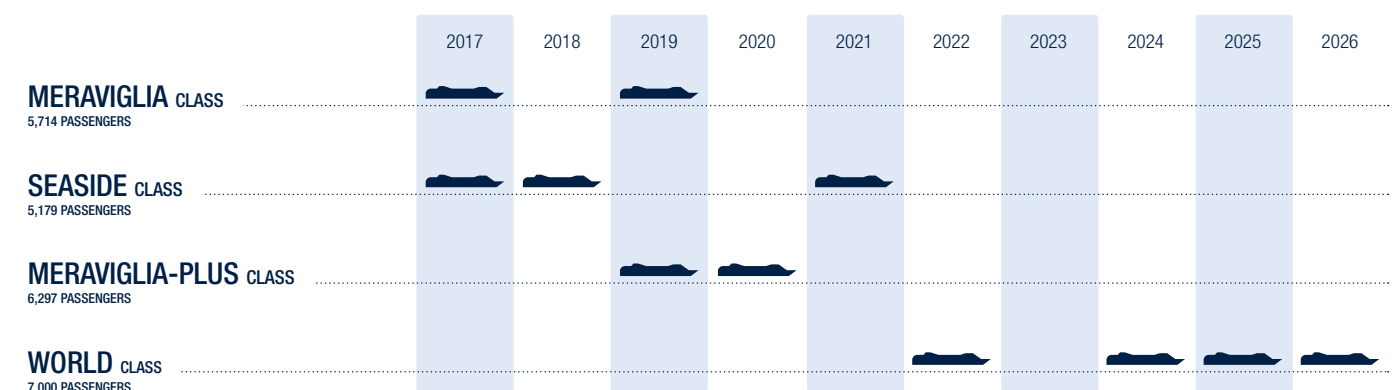

The MSC Cruises experience embodies the elegant side of the Mediterranean to create unique and unforgettable emotions for guests, through discovery of the world's cultures, beauties and tastes.

In 2014, MSC Cruises launched an investment plan to support the second phase of its growth through the order of two ships of the Meraviglia generation and two others of the Seaside generation (plus an option for a third) and, in February 2016, confirmed the existing options to build a further two now Meraviglia-Plus ships with an even greater capacity.

In April 2016, this rose to €9 billion with the announcement of signing of the letter of intent to build a further four ships, each with next-generation LNG propulsion technology. Consequently, between 2017 and 2026, a total of up to 11 new, next-generation MSC Cruises ships will come into service.

MSC Cruises' current modern fleet is the result of a €6 billion investment programme started in 2003. Following the addition of Fantasia flagship *MSC Preziosa* in March 2013, the fleet currently comprises 12 of the most modern ships at sea.
