

# Switch Hardware

Switch regular (as wall hook) Switch cut (as joinery pull) and Switch cut (as wall hook) – Off white

The Switch range is hand crafted architectural hardware designed to enhance the sensory experience and small tactile details of interior and exterior spaces. The hardware collection includes a range of handmade geometric ceramic forms in two different size formats, regular and cut.

Able to adapt to both wall hook and joinery pull applications, Switch is available in different formats with glazed or unglazed surface finishes. The forms are high-fired and robust making them well suited to daily use in residential or commercial environments. Switch is supplied with stainless-steel fixings to suit both interior and exterior installation applications, powder coated to colour match the glaze finish.
