

Lulu was constantly getting crystals and infections and it started to get serious. I am so glad I found Pure, Lulu as of last Friday is officially crystal-free! The labs and usg confirmed that her bladder and kidneys are in perfect shape

RENATA AND LULU

Increasing fluid in your dog's diet is an active way to manage recurring UTI issues. Simply add water to our natural, grain-free recipes at the prep stage to ensure your pooch is getting the fluid they need.

You may spot results straight away, but our expert vets recommend an 8-week period before your pet reaps the full rewards of a Pure diet.

BON-A-PET-ITE!
