FACILISIGHT

REMOTE ACCESS, ALERTS, AND ANALYTICS FOR
HANDS-ON CONTROL — FROM ANYWHERE.

Remote Access & Control

Whether you're managing one space or many, easily adjust setpoints, fine-tune schedules, and keep operations running smoothly — all from a single, centralized interface. Enjoy unlimited user accounts and secure logins from any device.

Alerts

Facilisight keeps you informed with real-time alerts tailored to your needs. Get instant notifications via email or in app when conditions change or equipment needs attention. Use ready-made alerts or customize them to stay proactive.

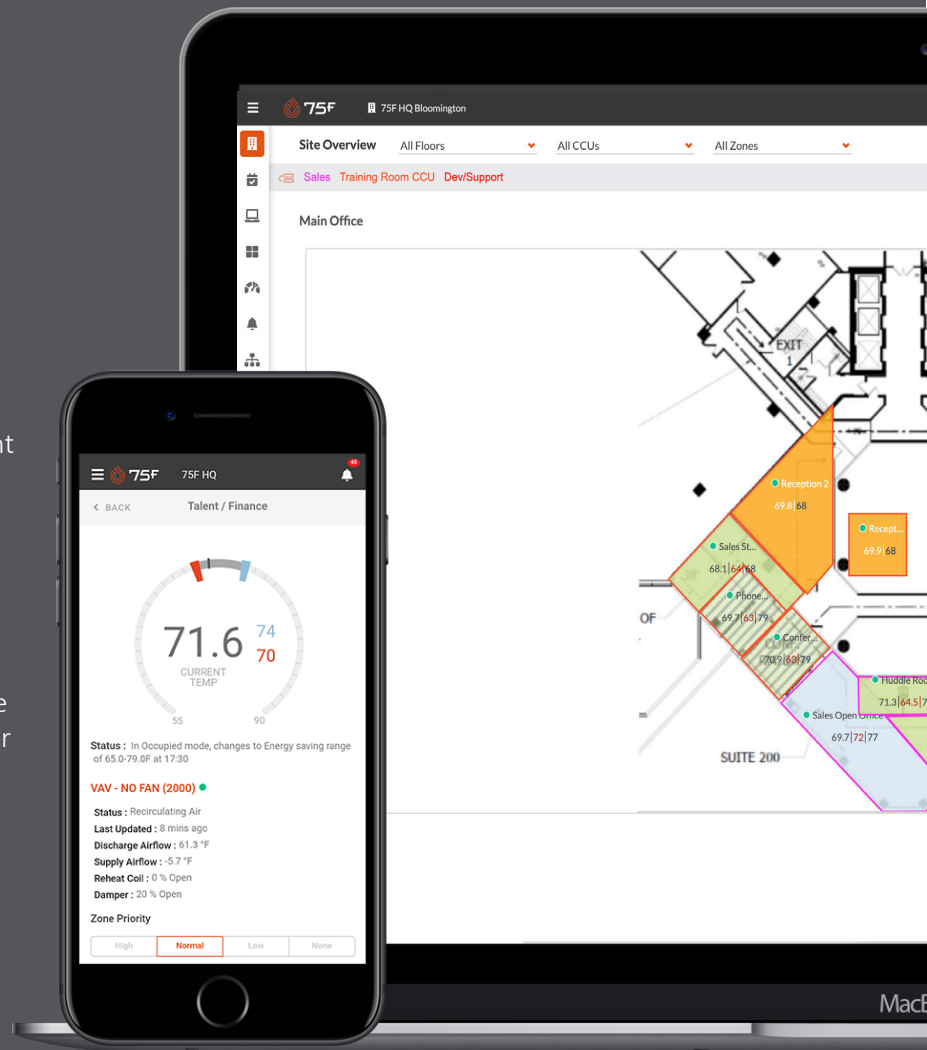

Analytics

Unlock deep insights with powerful analytics that bring your building data to life. Visualize performance with equipment graphics, custom heatmaps, and over 1,000 built-in charts, plus audit trails and read-only diagnostics with 75F Active Scan.

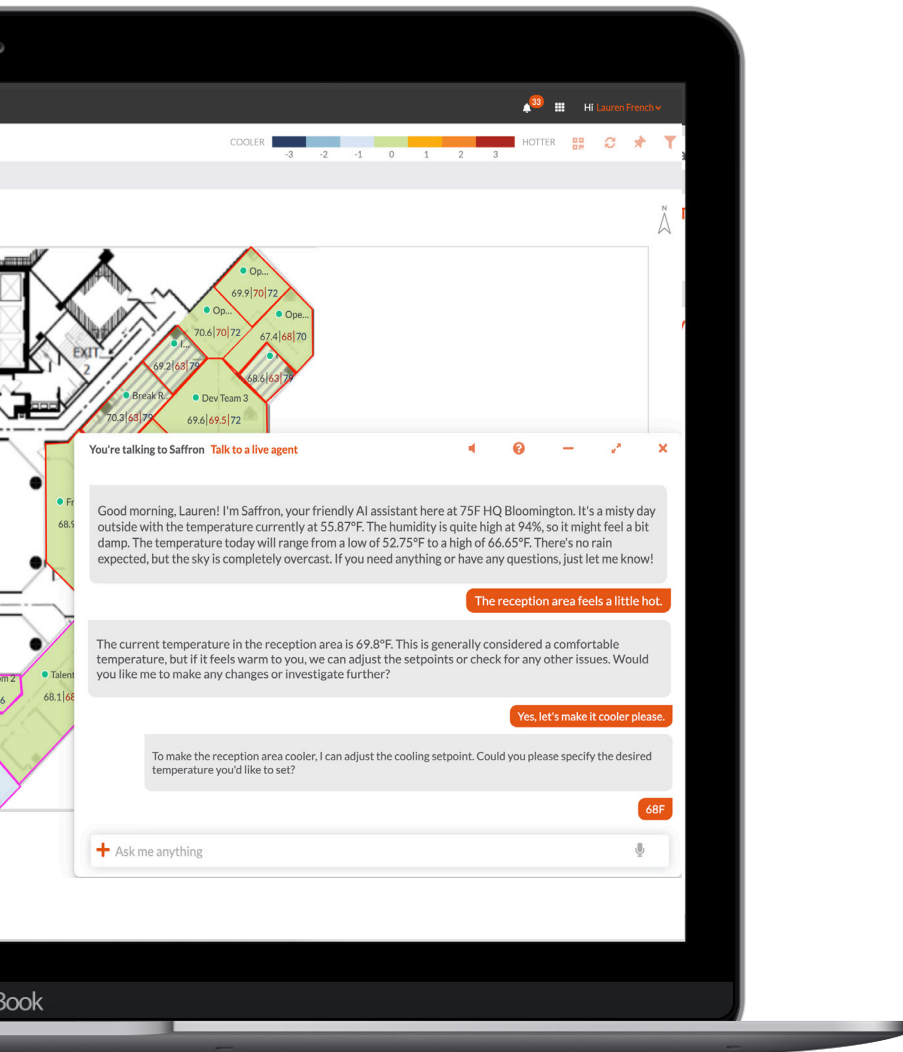

Support

Get live U.S.-based support by phone or email whenever you need it — plus free over-the-air updates to keep your system running at its best.

FACILISIGHT PRO

HANDS-FREE CONTROL AND INSIGHT WITH AI THAT KNOWS YOUR BUILDING BEST.

Saffron AI

Saffron AI transforms building management with natural, conversational control over your spaces. Drawing from your building's digital twin, it delivers custom dashboards, real-time diagnostics, and instant command execution — just type or say what you need.

Automated Demand Response

Enhance energy performance with intelligent load management. Facilisight Pro enables seamless participation in automated utility demand response programs, dynamically adjusting building systems to reduce peak demand and unlock greater savings.

Extended Monitoring & Analytics

Facilisight Pro offers powerful tools to visualize and act on performance trends. Build and share custom dashboards, leverage Site Manager and Site Sequencer for precision mapping and control, and tap into lifetime historical data to drive smarter decisions.
