

QUE
CATALOGUE

"Inspired by the flow of water,
QUE embraces fluted architectural
detailing. QUE invites you to experience
it in both a tactile and visual way."

Our QUE vanity celebrates lines and texture with its textured detail. The ability to customise QUEs profile from fluted, to a range of ribbed or battened looks, allows for an endless variety of finished options to suit your personal taste.

The element of customisation continues through the choice of basin shape, benchtop material and either a polyurethane consistent finish or a choice of various veneer profiles for a timber look.

The gorgeous curves that QUE features add to enhance its natural shape and fuse beautifully with its corresponding mirror cabinets. The synthesis between the curved edges and the fluted profile detail combine to showcase a vanity that is a beautiful piece of bathroom furniture.

Features

Soft close drawers

Enjoy the peace and quiet with our soft-close drawers. Using industry leading Häfele hardware, soft close technology minimises the stress placed on the cabinet. Thus, extending the life of your vanity.

Fluted drawer detail

Fluted Drawer fronts add another element of texture and beauty to QUE. With an option of selecting a fluted, rubbed or battened detail in various thicknesses and colours you can customise QUE entirely.

LED cabinet lights

Lighting can often be overlooked, we believe it is an essential inclusion hence why all of our cabinetry features LED lighting. Organise your drawers with ease, any time of the day.

Black melamine internals

As a standard, all xox vanities have black melamine internals. Melamine is a hard resin which results in a durable and highly attractive finish. The material is also waterproof, making it the ideal choice for inside the cabinetry.

Australian-made

Rest assured knowing that your vanity is made locally. Each piece is handcrafted to ensure that you receive the best quality product which will last a lifetime. Our vanities are designed and made in Australia.

Finishes

An endless combination of benchtops with veneer or polyurethane cabinetry. Our QUE vanities can be further customised with a choice of nine textured MDF profiles. Our designers have specified the following combinations but as with any xox vanity, the possibilities are infinite.

Textured MDF
