

RAE
CATALOGUE

“An elevation of classic design
that celebrates natural materials.”

RAE is a manifestation of quality material and usability that produces a vanity of utmost luxury and opulence. Featuring a custom stone slab top and timber veneer drawer fronts, RAE can be tailored to feature materials of your choice.

The shadow line of this vanity is where the focal point lies. The benchtop stone is perfectly integrated around the recess of the drawers. This detail requires a high level of craftsmanship and adds to the simple elegance that RAE exudes.

RAE is an exhibition of gorgeous materials and classic design that will enhance any space.

Features

Soft Close Drawers

Enjoy the peace and quiet with our soft-close drawers. Using industry leading Hafele hardware, soft close technology minimises the stress placed on the cabinet. Thus, extending the life of your vanity.

Luxury Internals

Lighting can often be overlooked, we believe it is an essential inclusion hence why all of our cabinetry features LED lighting. Organise your drawers with ease, any time of the day.

Black Melamine internals

As a standard, all xox vanities have black melamine internals. Melamine is a hard resin which results in a durable and highly attractive finish. The material is also waterproof, making it the ideal choice for inside the cabinetry.

Australian-Made

Rest assured knowing that your vanity is made locally. Each piece is handcrafted to ensure that you receive the best quality product which will last a lifetime. Our vanities are designed and made in Australia.

Finishes

An endless combination of natural stone with veneer or polyurethane cabinetry. Our designers have specified the following combinations but as with any xox vanity, the possibilities are infinite.
